Vybarvi všechna zvířata, která mají dvě nohy. Do kroužku  
zvířata se čtyřma nohama. Která zvířátka zbyla a proč?

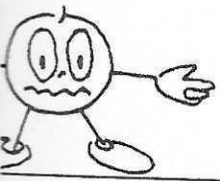

# Stejný počet

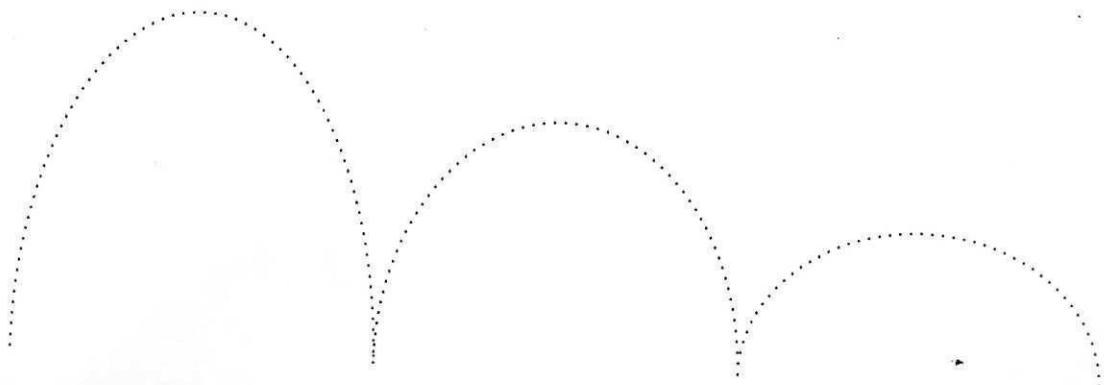

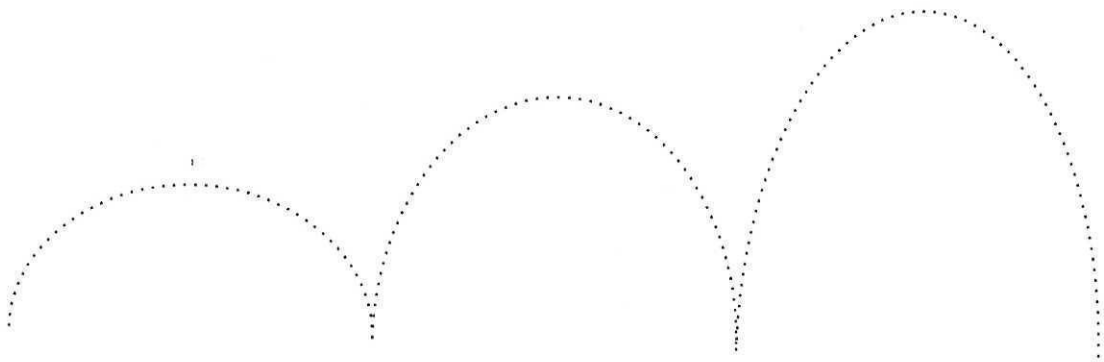

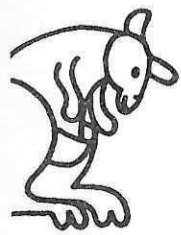

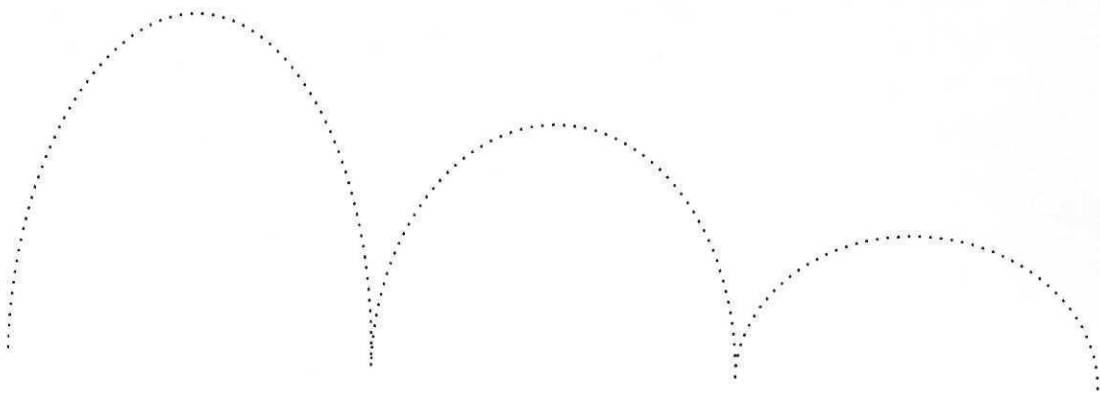

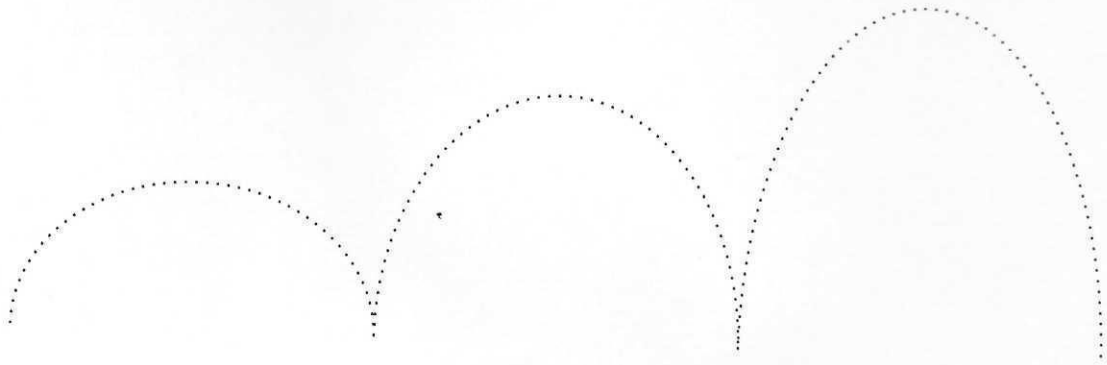

Na levé i pravé straně jsou zvířátka v různém množství na řádku. Pastelkami spoj čarou ta zvířátka, jejichž počet je vlevo i vpravo stejný.

Cíl: Naučit se počítat od 1 do 5.

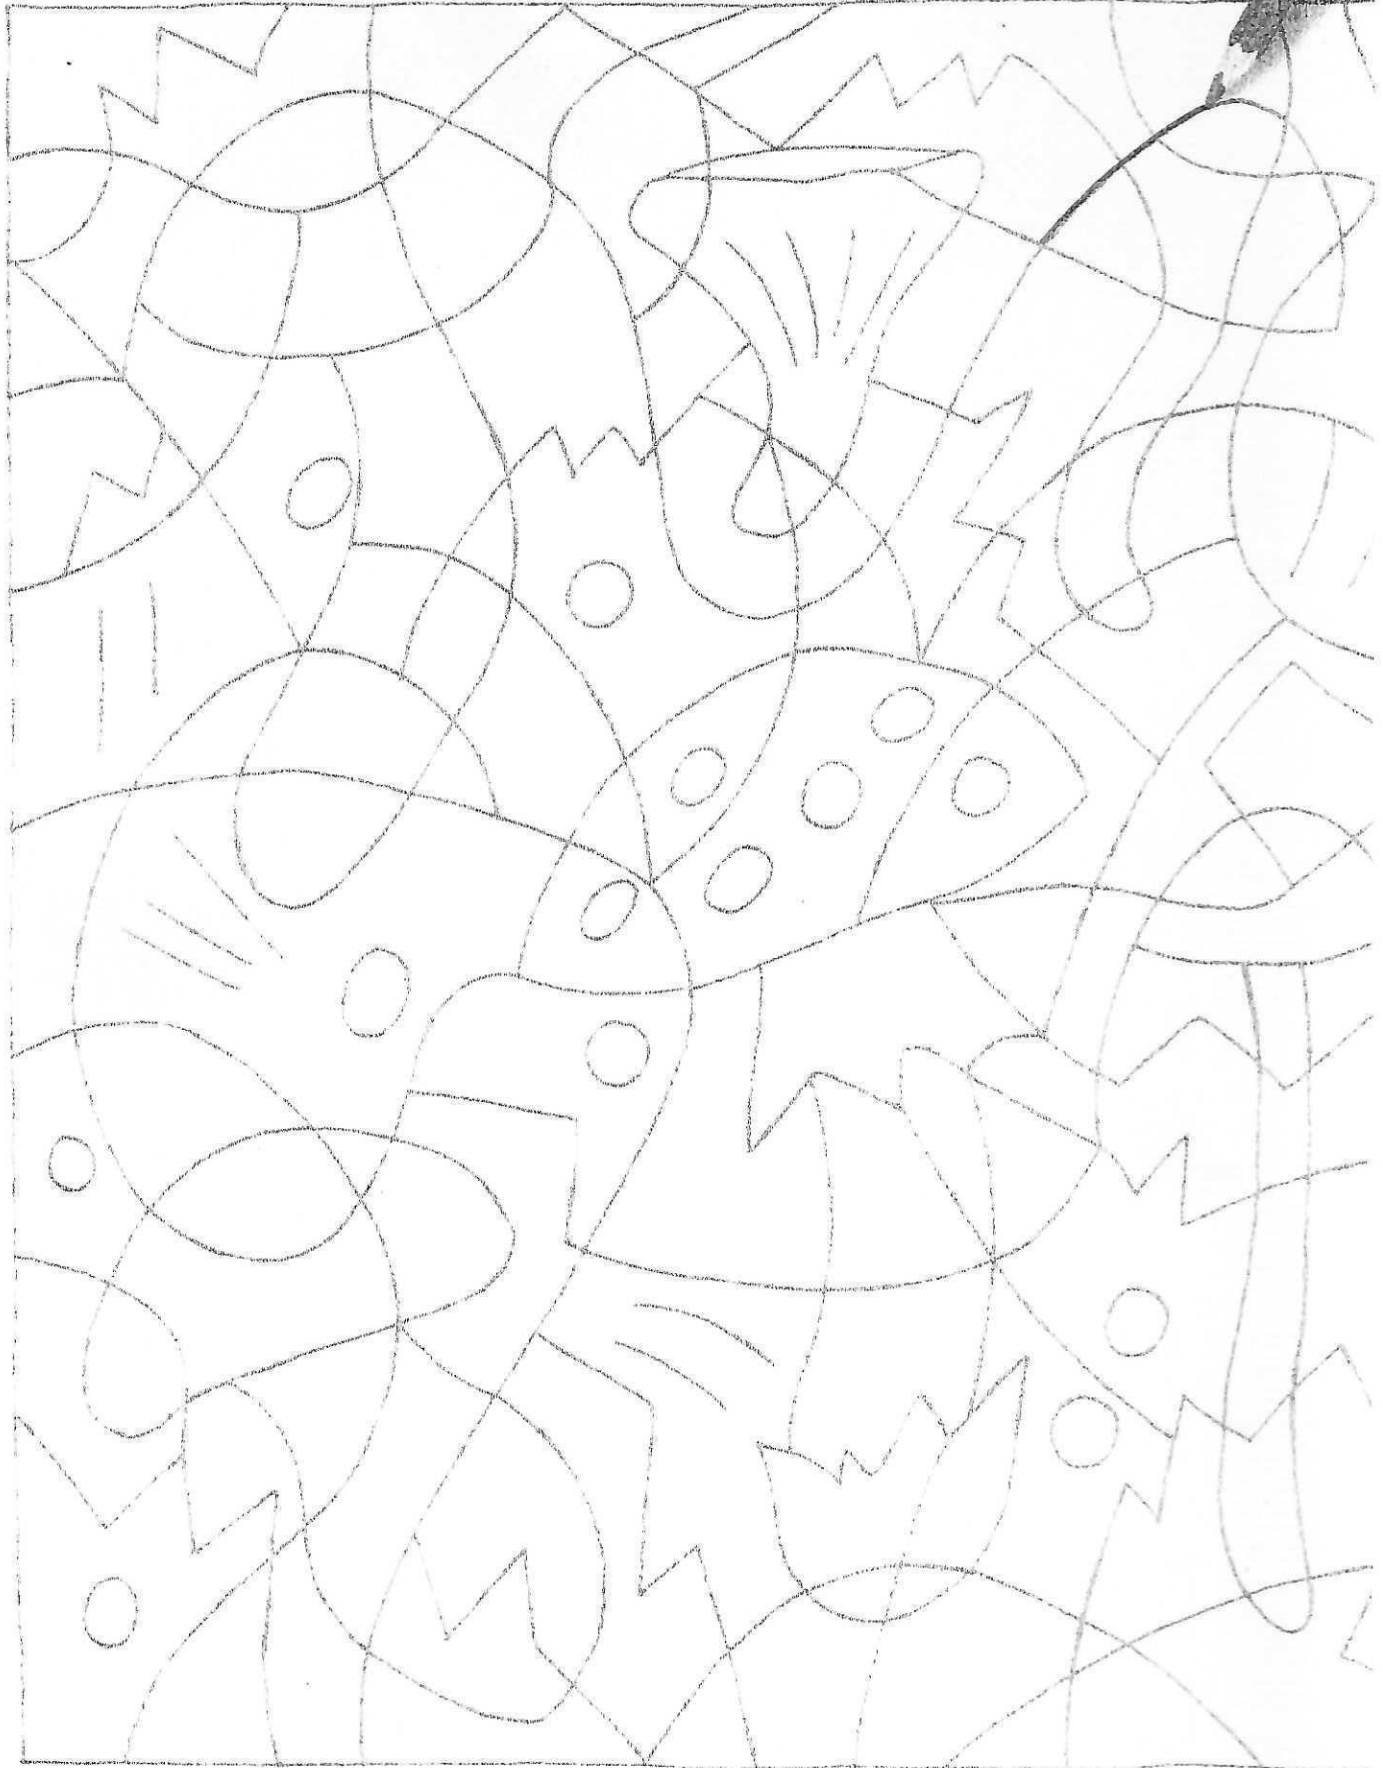

Klokan skáče hop - hop - hop. Zvířátko nejdříve vybarvi, potom spoj tečky čarou a uvidíš, jaké to byly skoky.

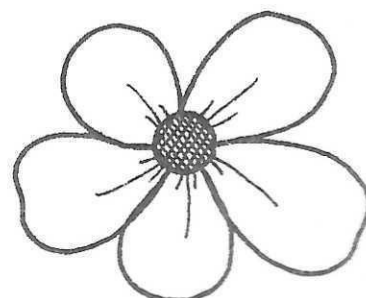

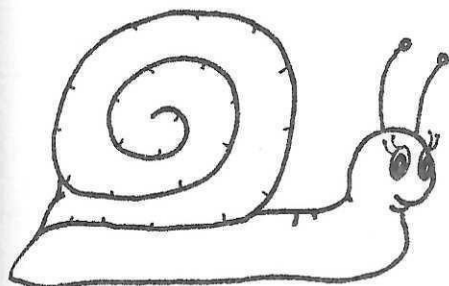

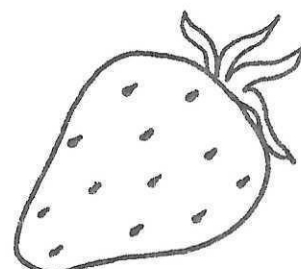

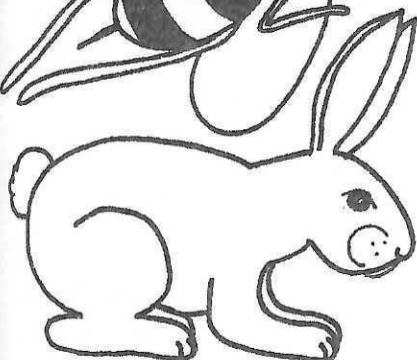

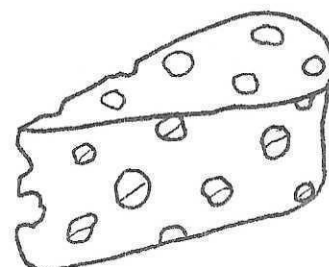

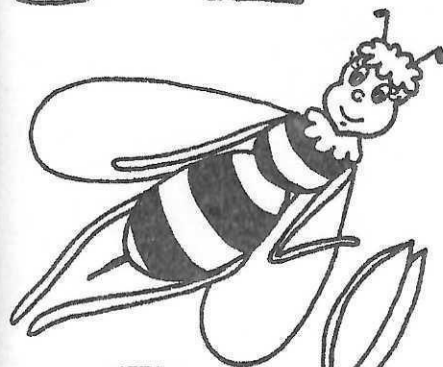

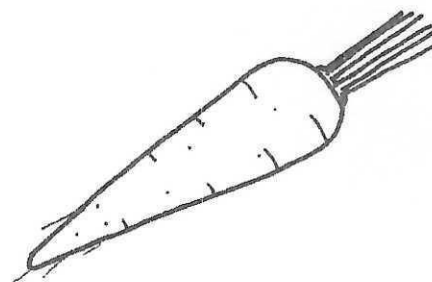

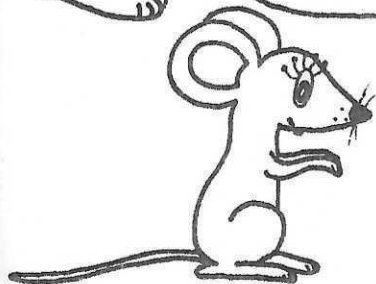

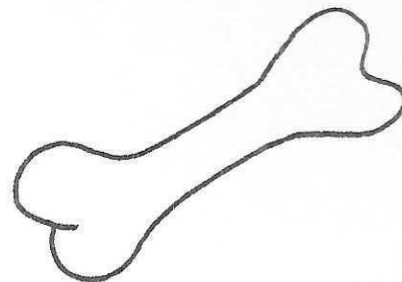

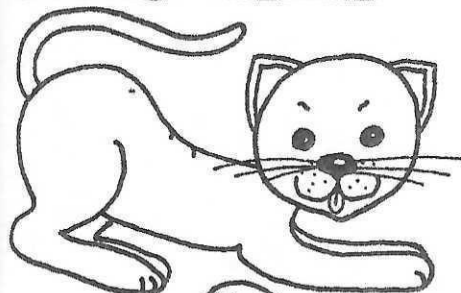

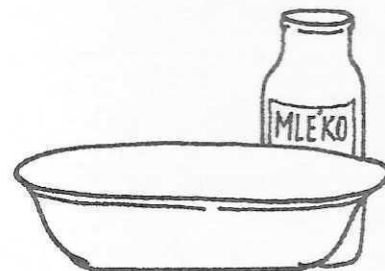

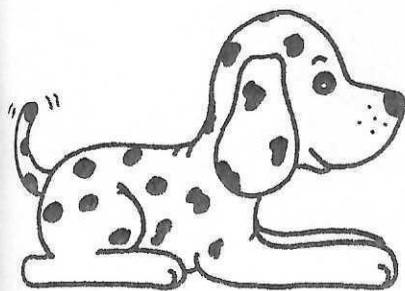

## S TUŽKOU NA HOUBY

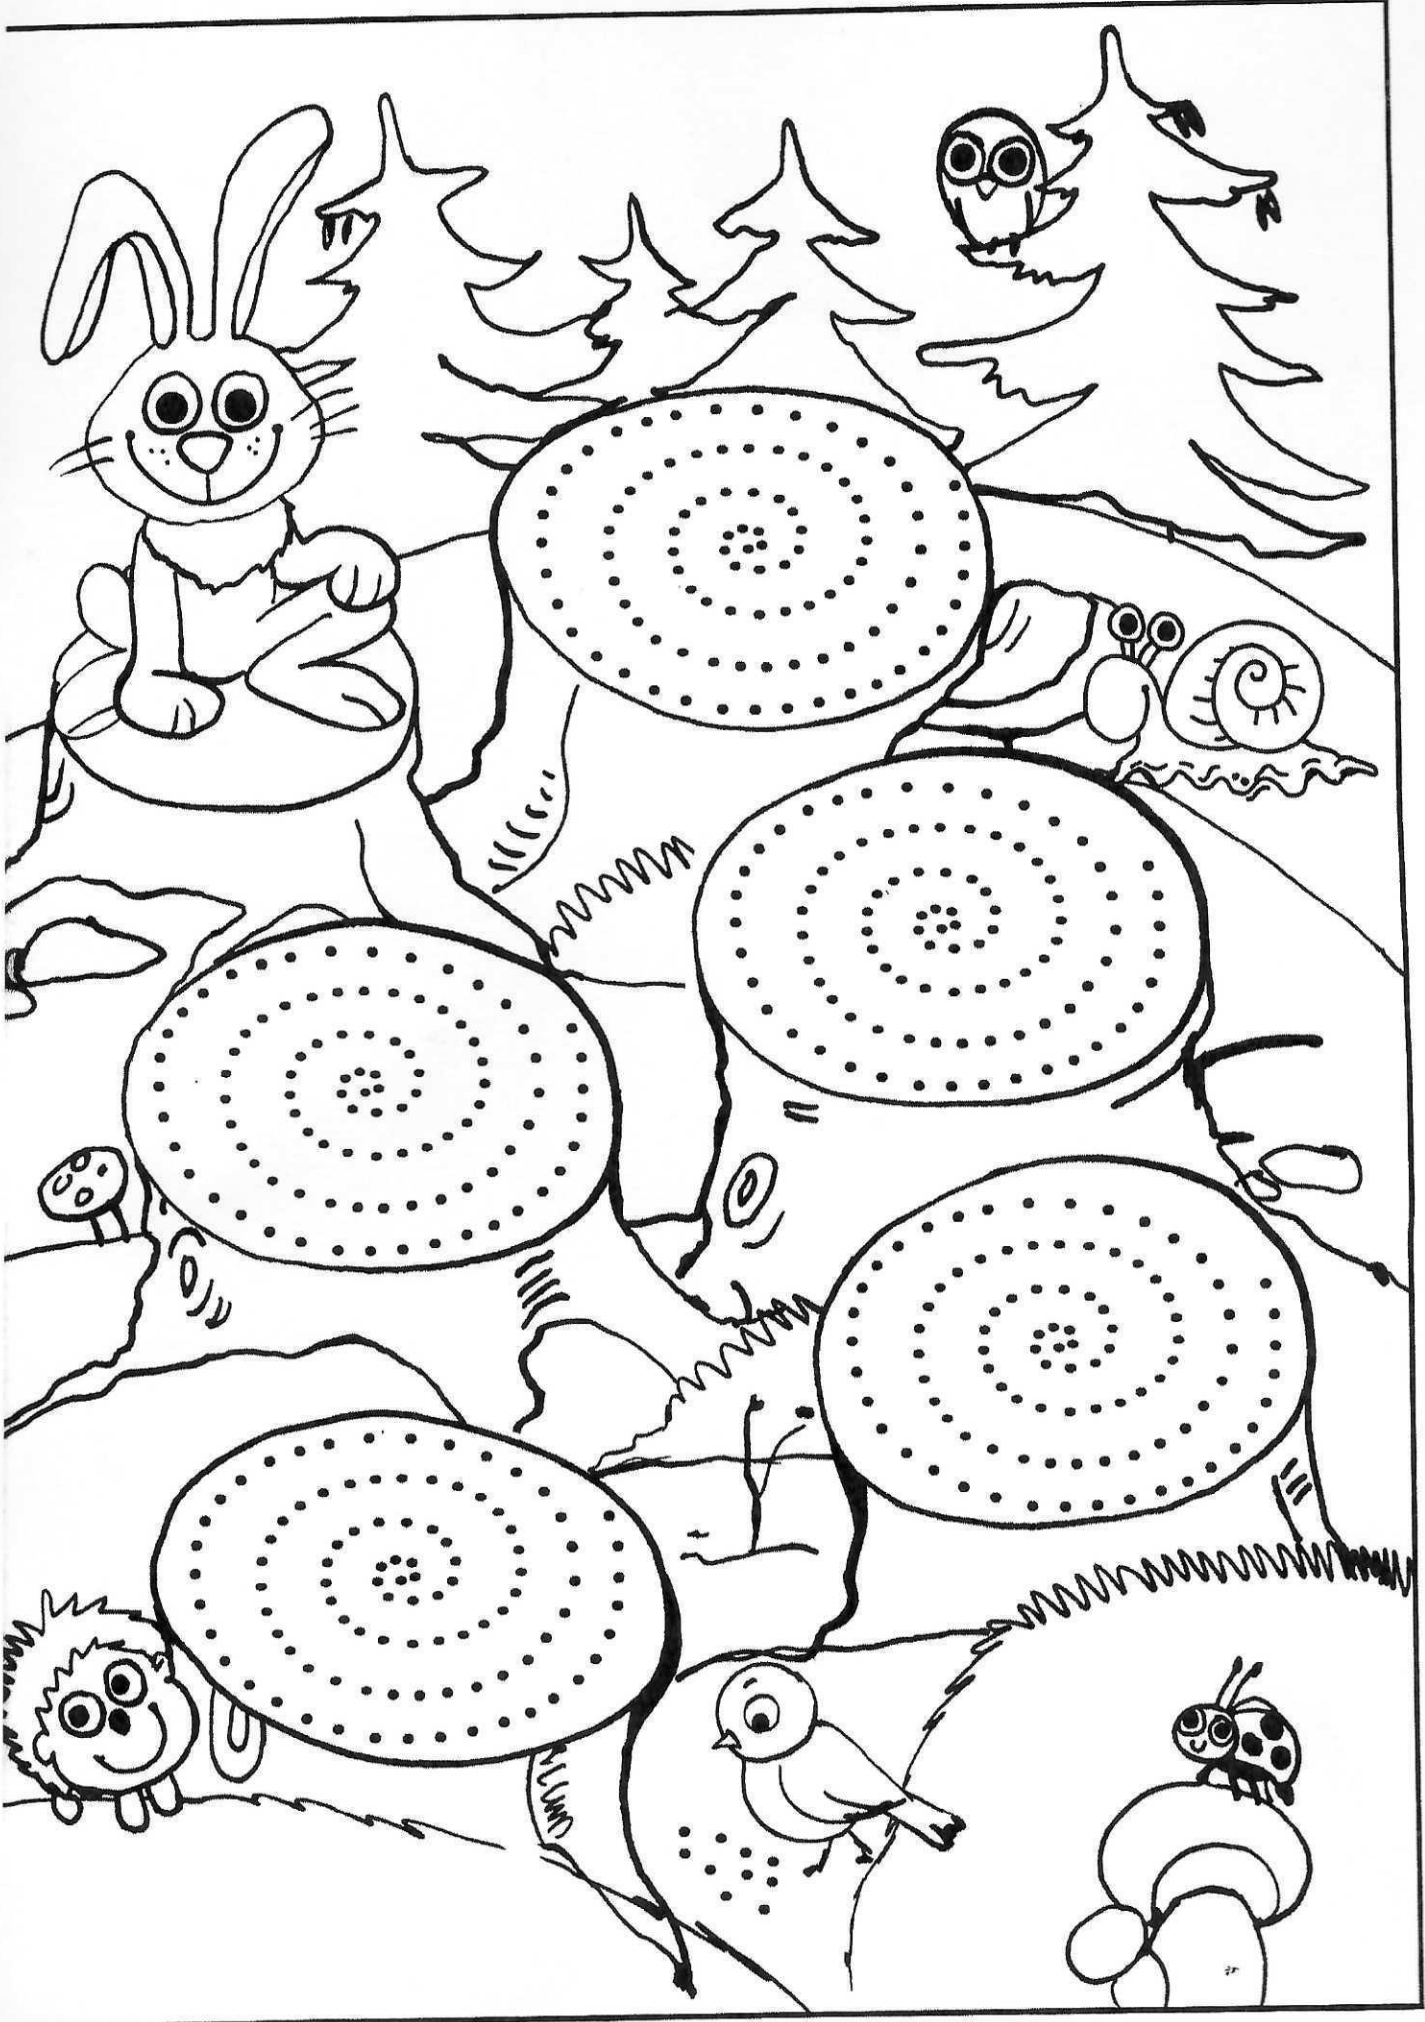

Pojď na výlet na houby. Dnes ale nepotřebuješ košík, bude ti stačit tužka a pastelky.  
Najdi ve spleti čar šest hub, obtáhni je tužkou a vybarvi podle atlasu nebo vlastní fantazie.

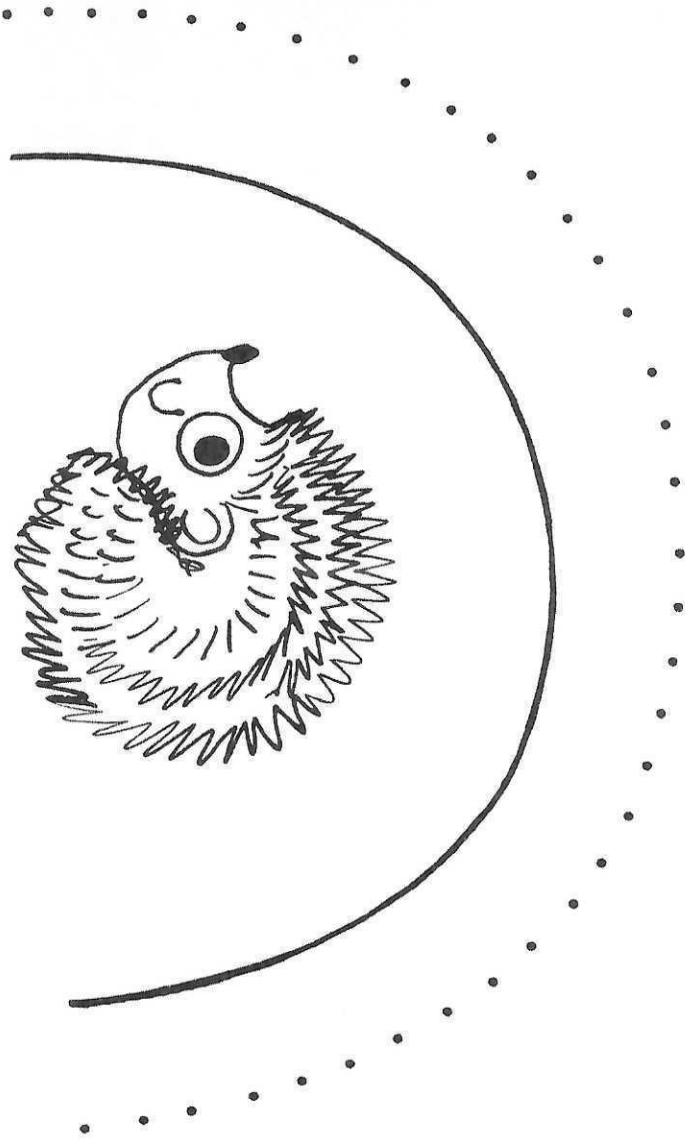

# HRAJEME SI OD JARA DO ZIMY, LEDEN - ÚNOR

Spoj čarou zvířátko s jeho potravou

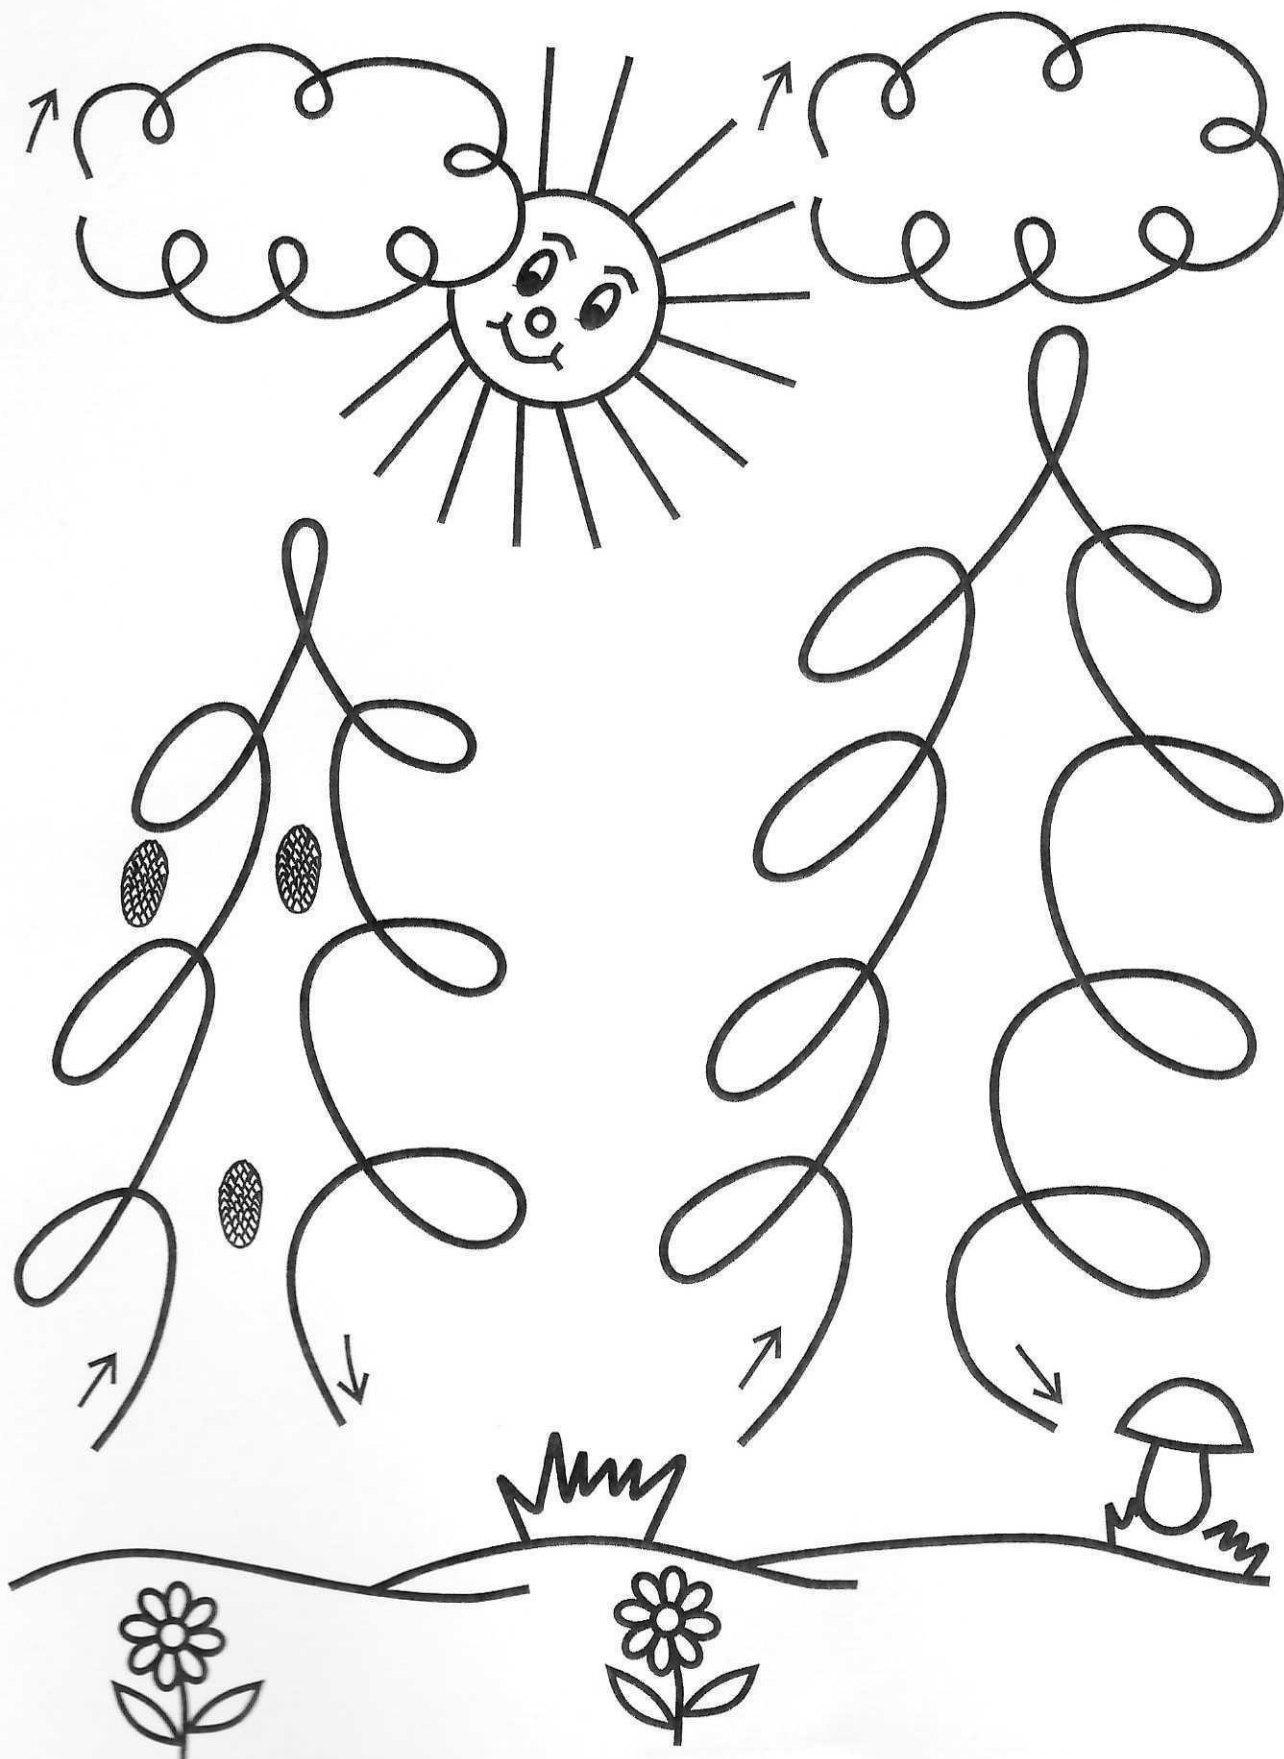

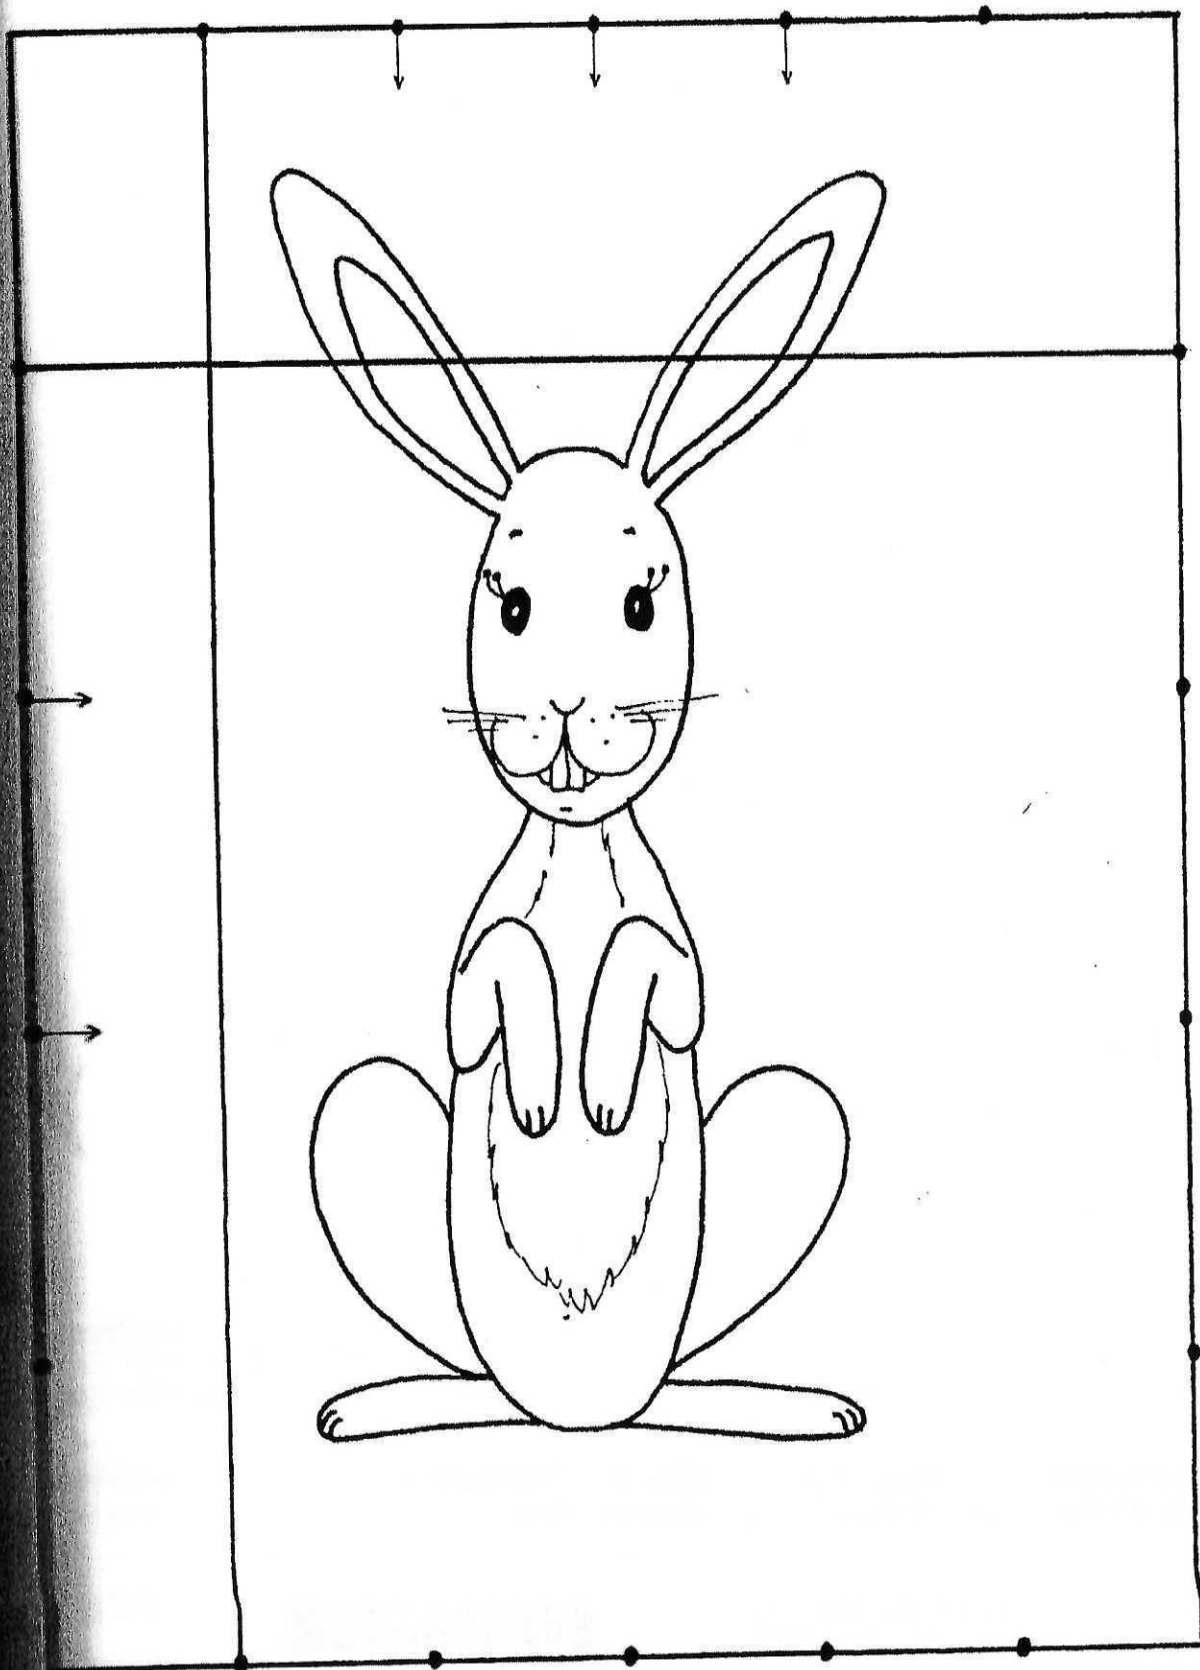

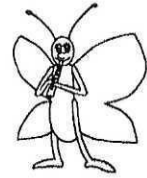

# 46. Les (jednotážka)

|    |     |     |     |                                                                                     |
|----|-----|-----|-----|-------------------------------------------------------------------------------------|
| 5+ | BIO | PSY | ENV |  |
|----|-----|-----|-----|-------------------------------------------------------------------------------------|

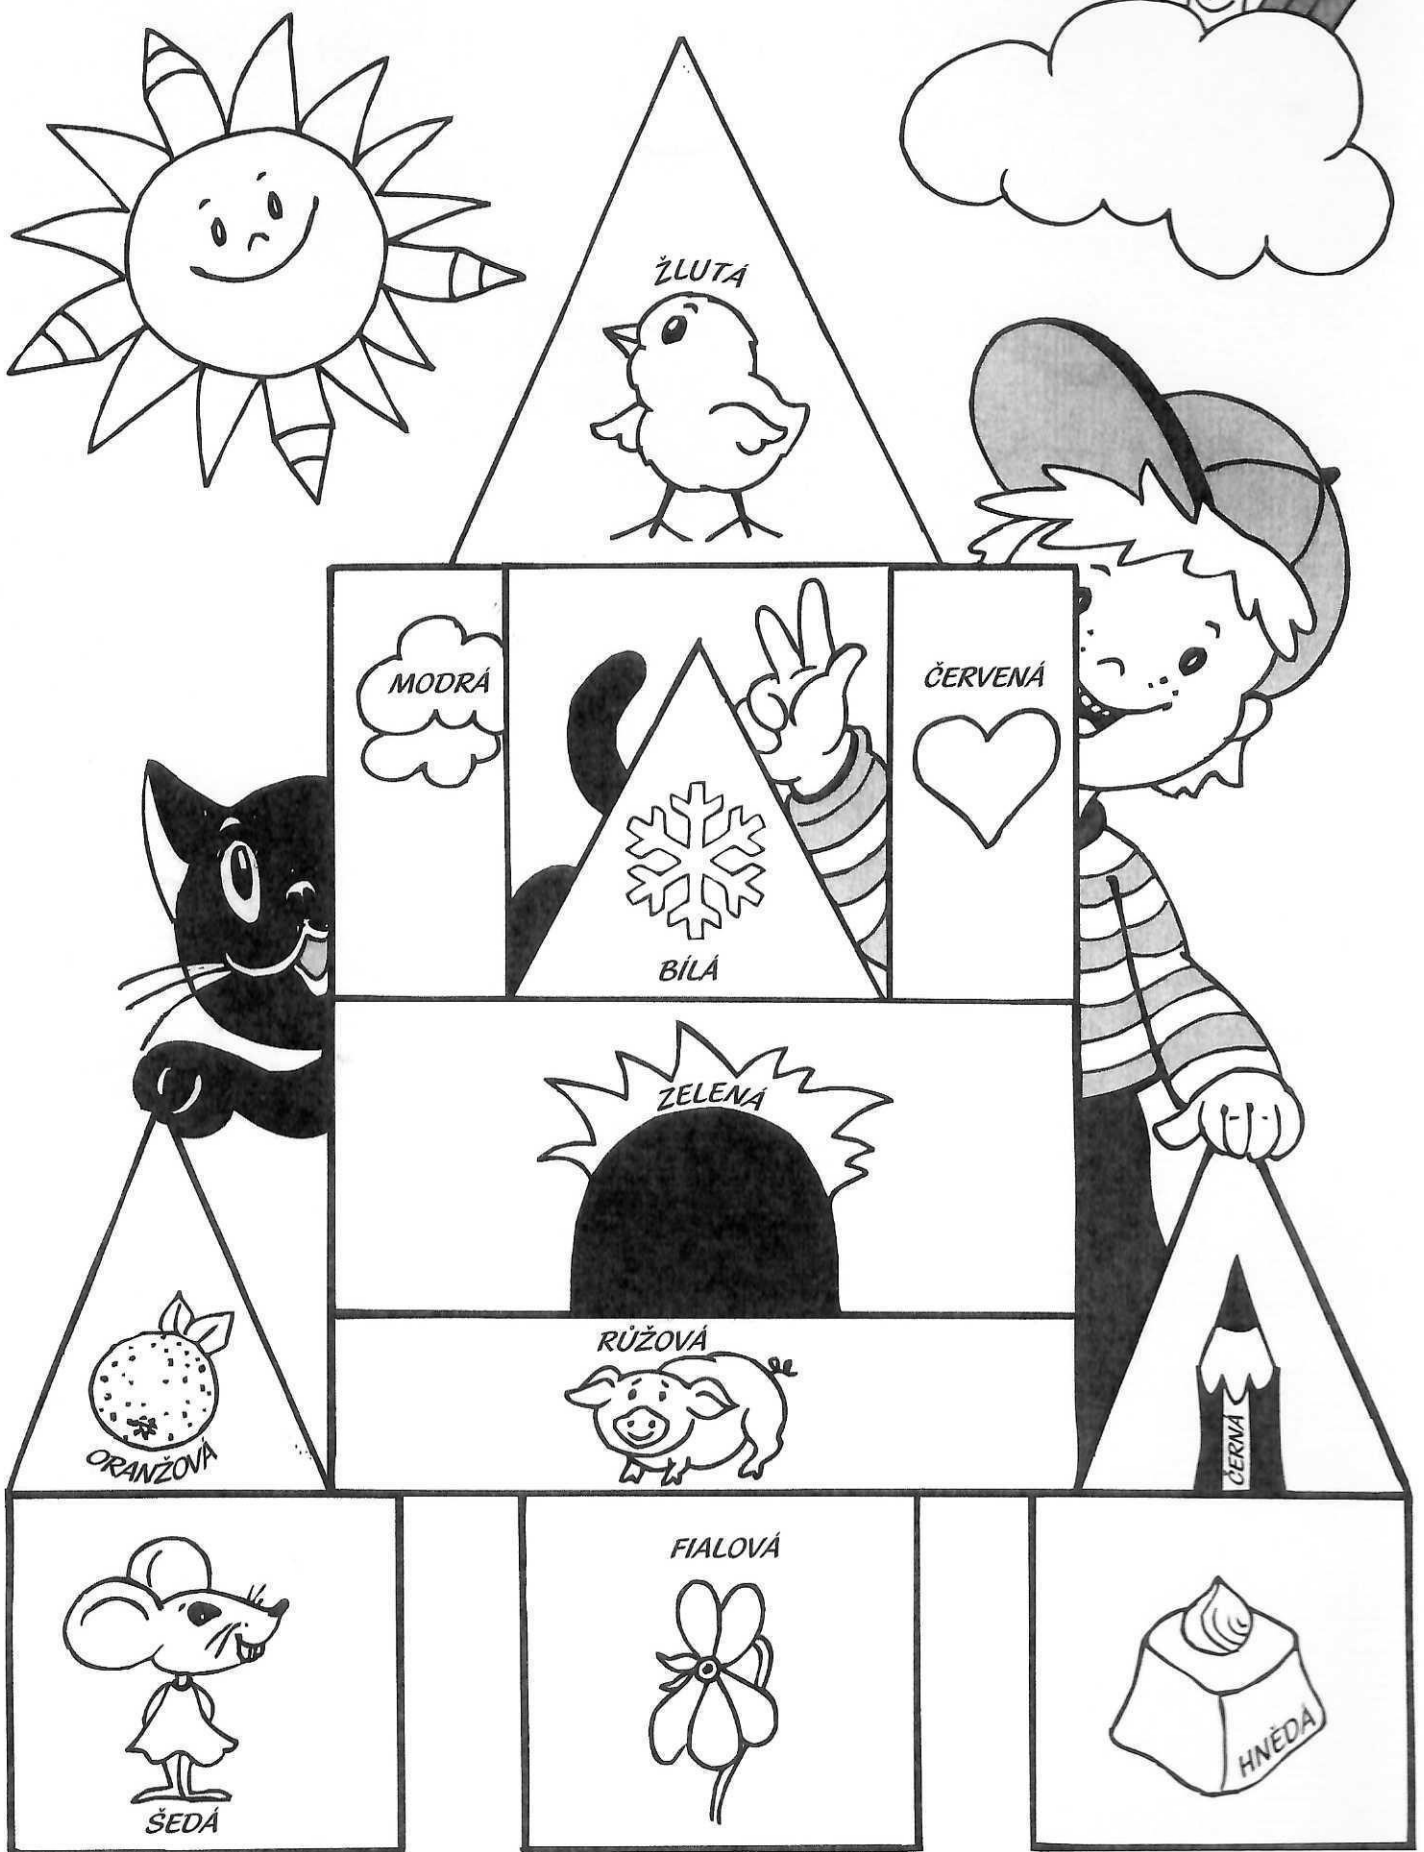

Obtáhni jedním tahem stromy a mraky podle směru šipek. Dokresli do obrázku to, co můžeš vidět v lese (např. květiny, šišky, houby apod.).

# DOKRESLI KRÁLÍČKOVU KLEC

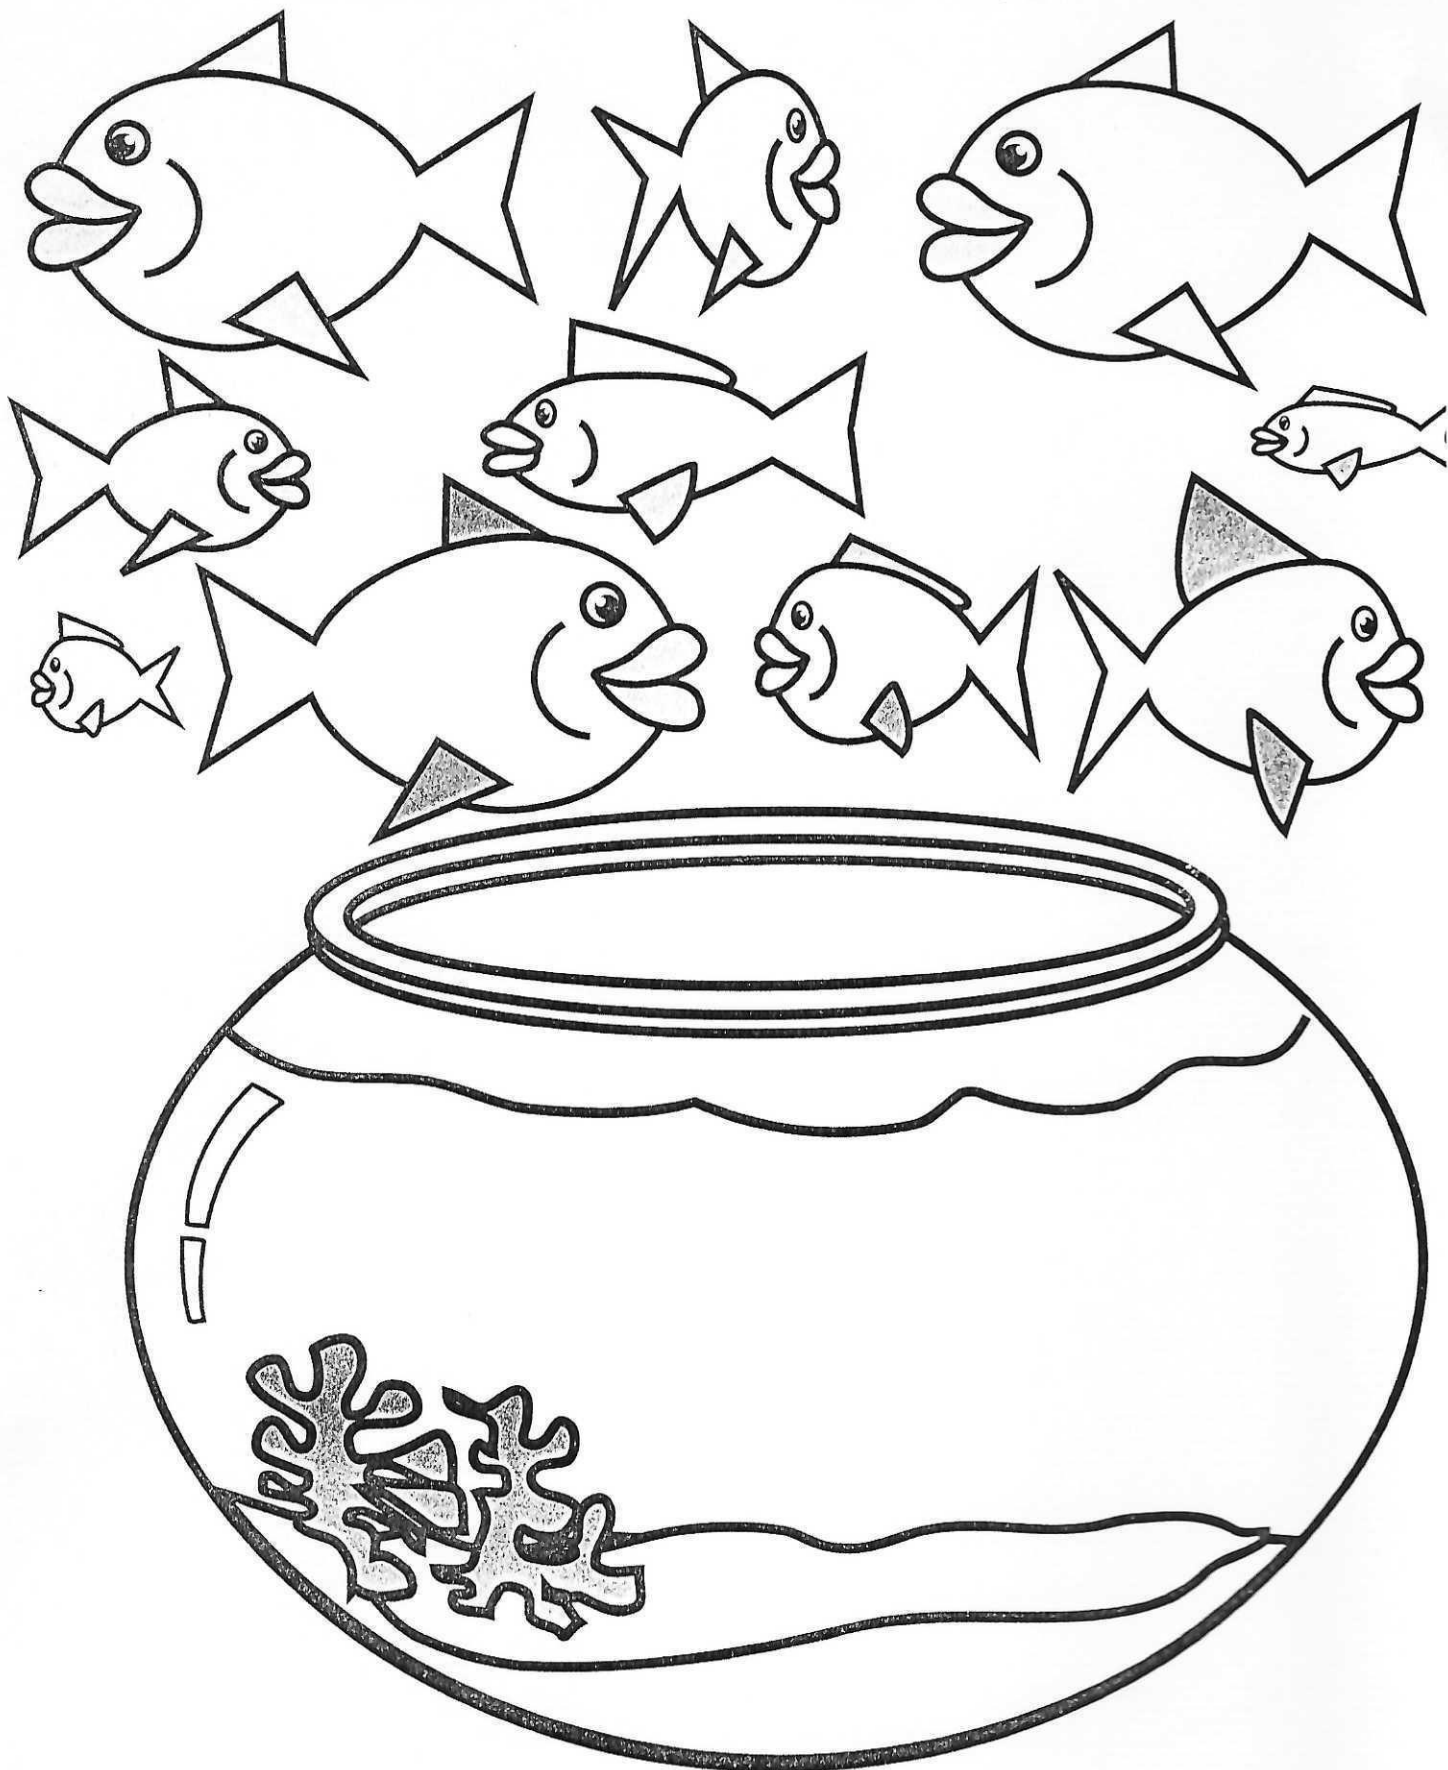

# BAREVNÝ ZÁMEK

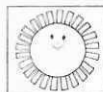

- Pomoz Nomíkovi dokončit zámek tím, že ho vybarvíš charakteristickými barvami obrázků v kostkách a tvarech stavebnice.

# Najdi tři rybky

Vybarvi tři ryby, které mají stejnou velikost.  
Pak nakresli do akvária svou vlastní rybu.

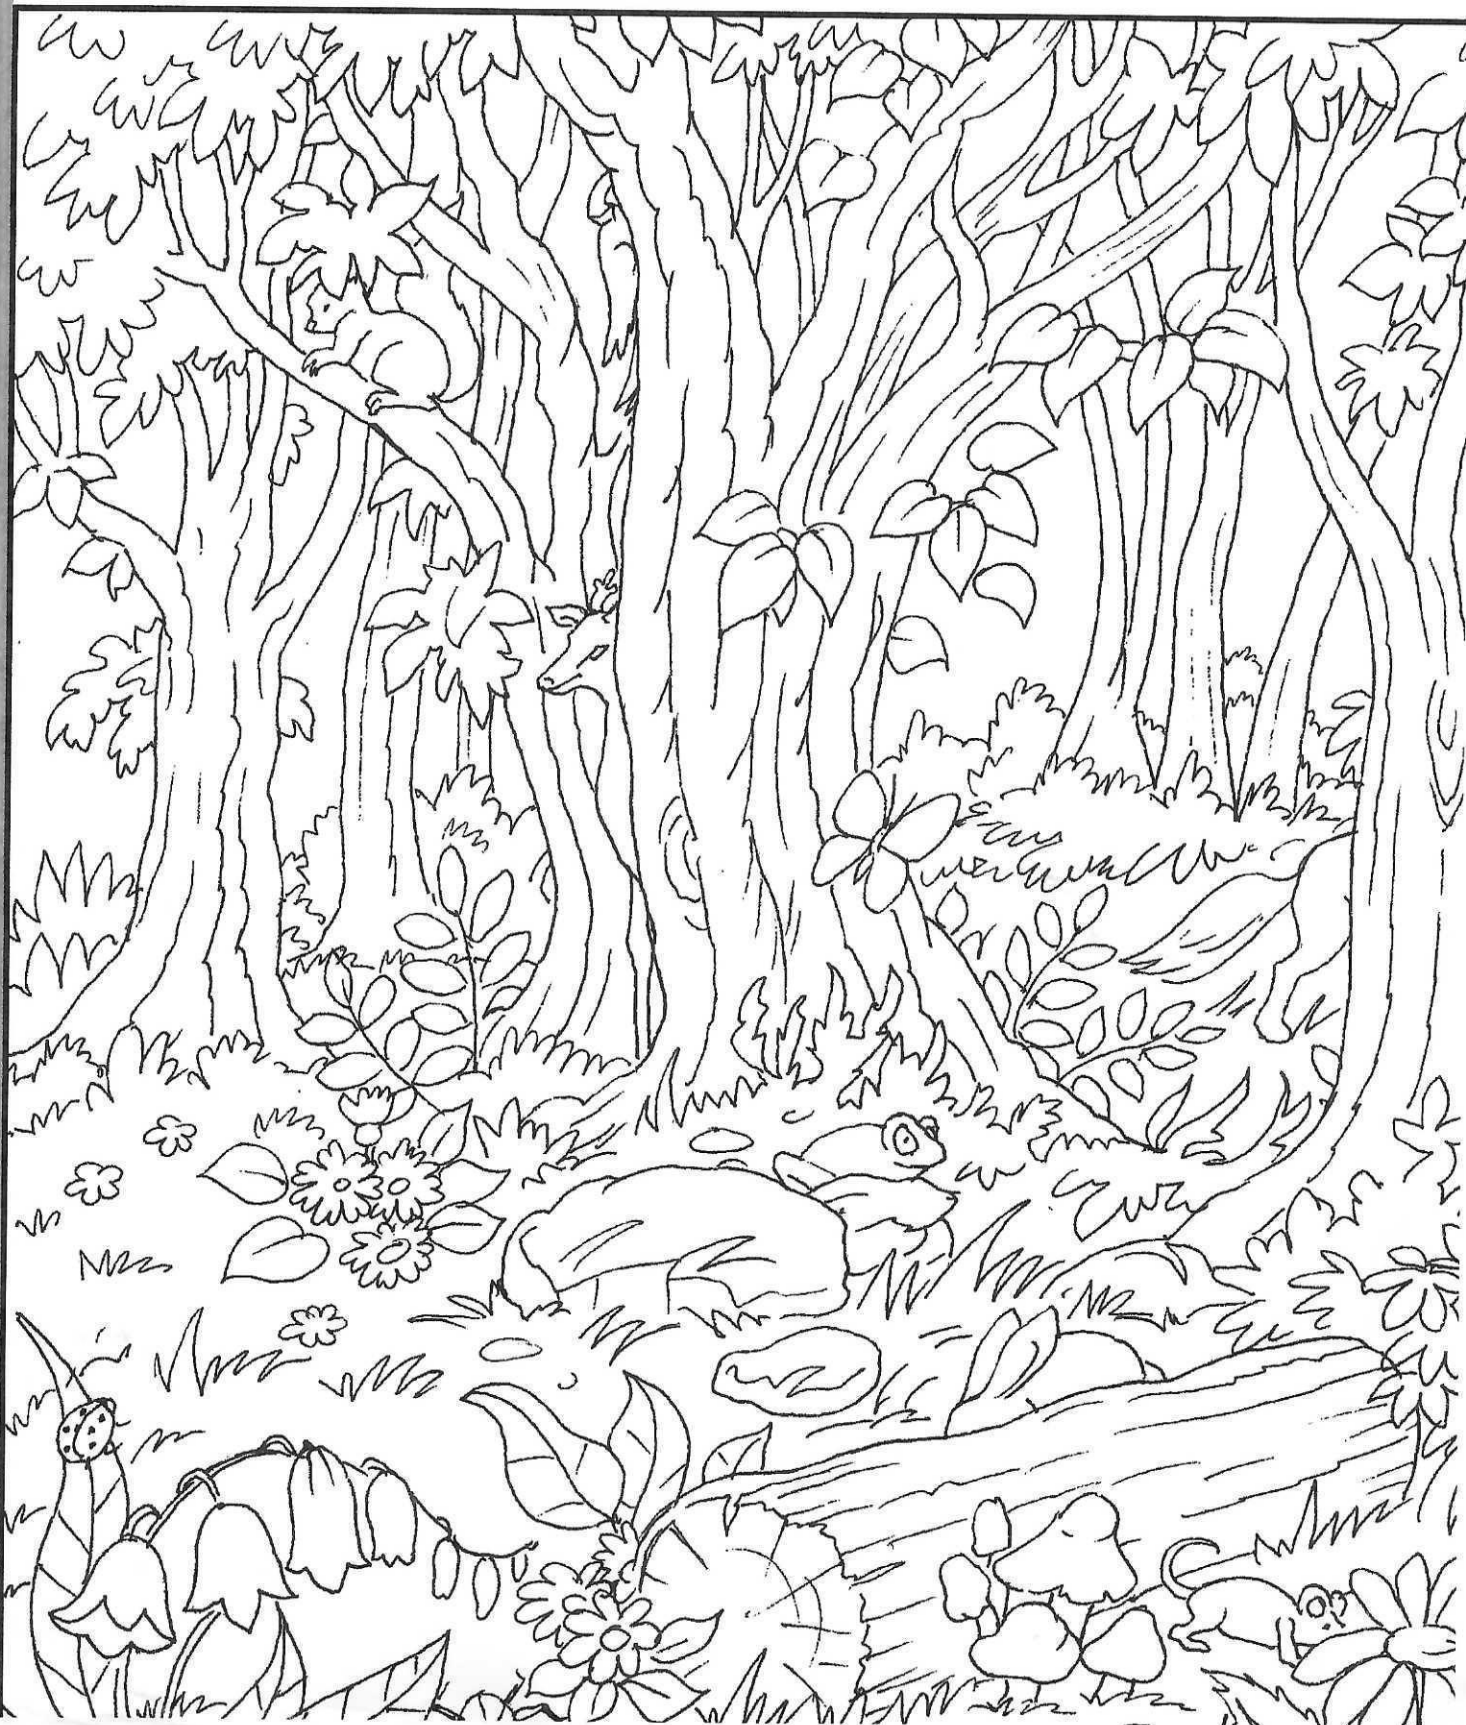

# 1. Umíš rozlišit nahoře a dole?

Šimon by rád vybarvil šnečky dole hnědou pastelkou a šnečky nahoře žlutou pastelkou.  
Pomůžeš mu?

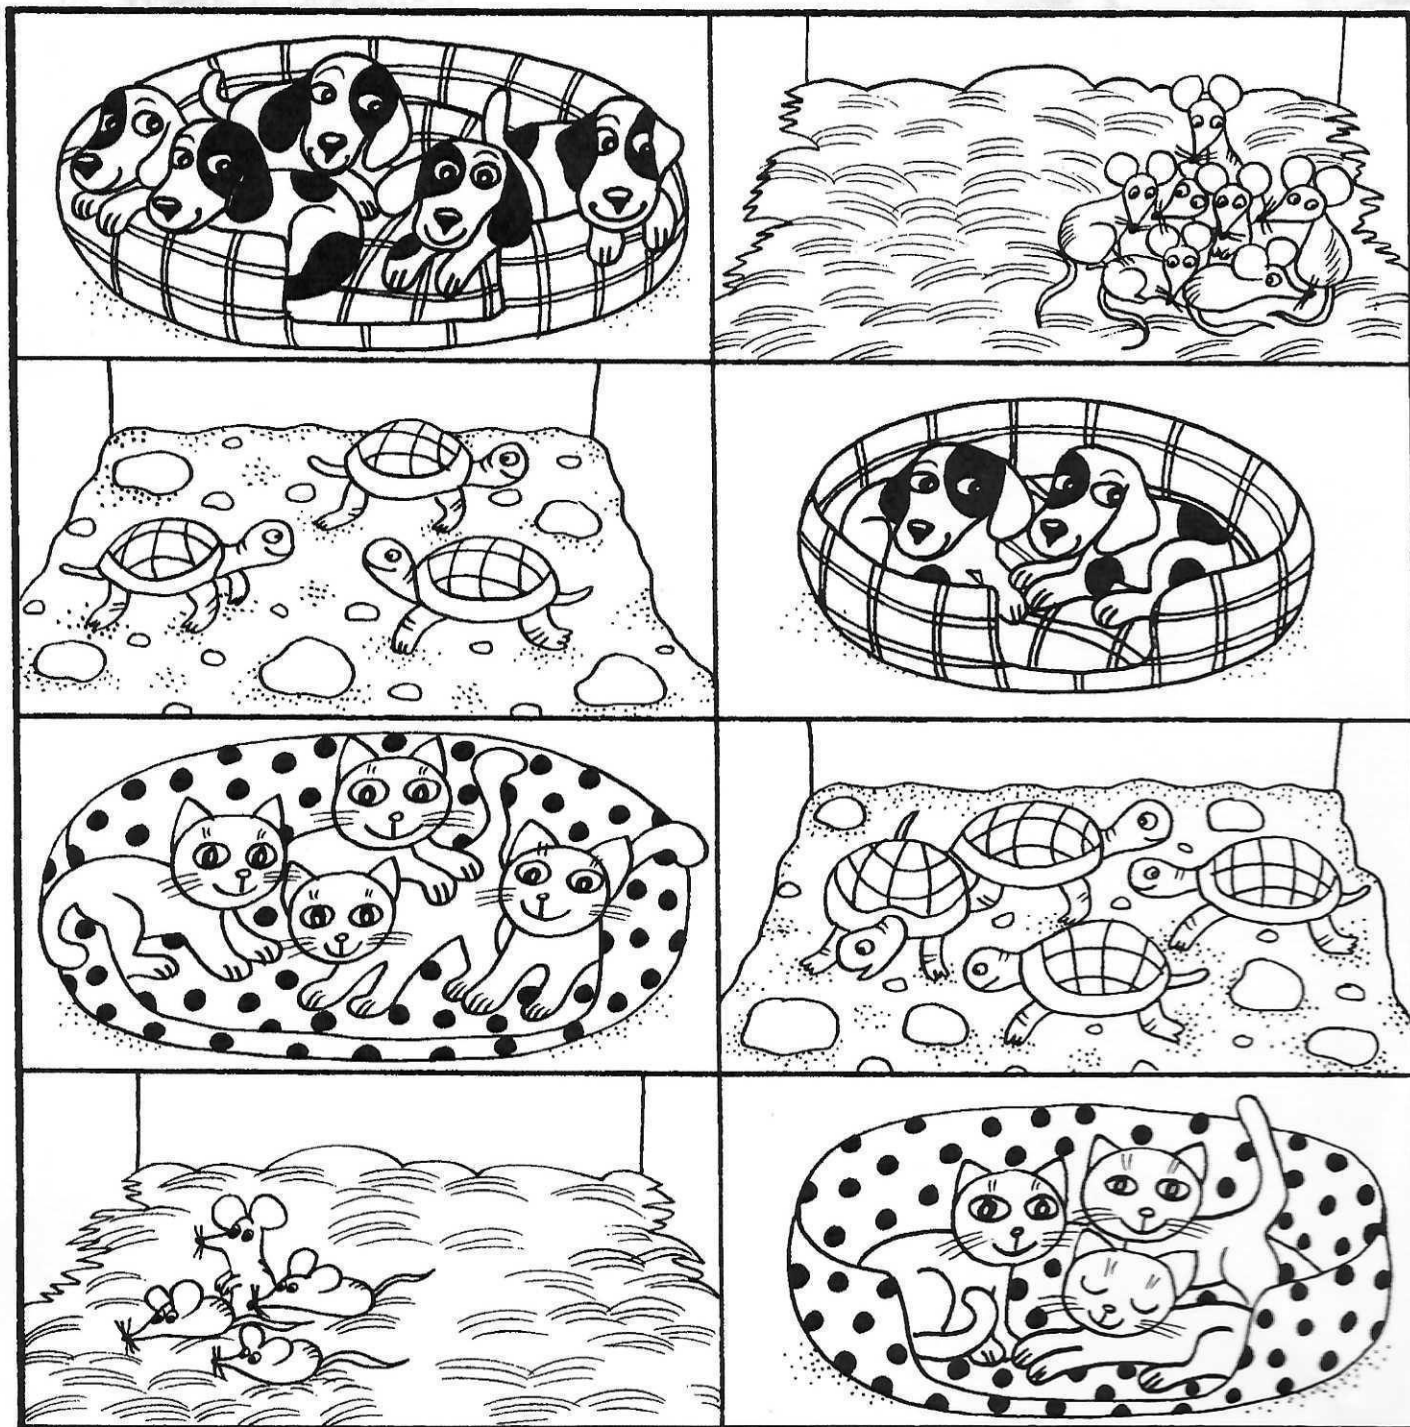

# Ukrytá zvířátka

Pozorně si prohlédni obrázek. Mezi stromy se schovávají různá zvířátka. Najdi je a obrázek vybarvi.

# Kde je víc, a kde je méně?

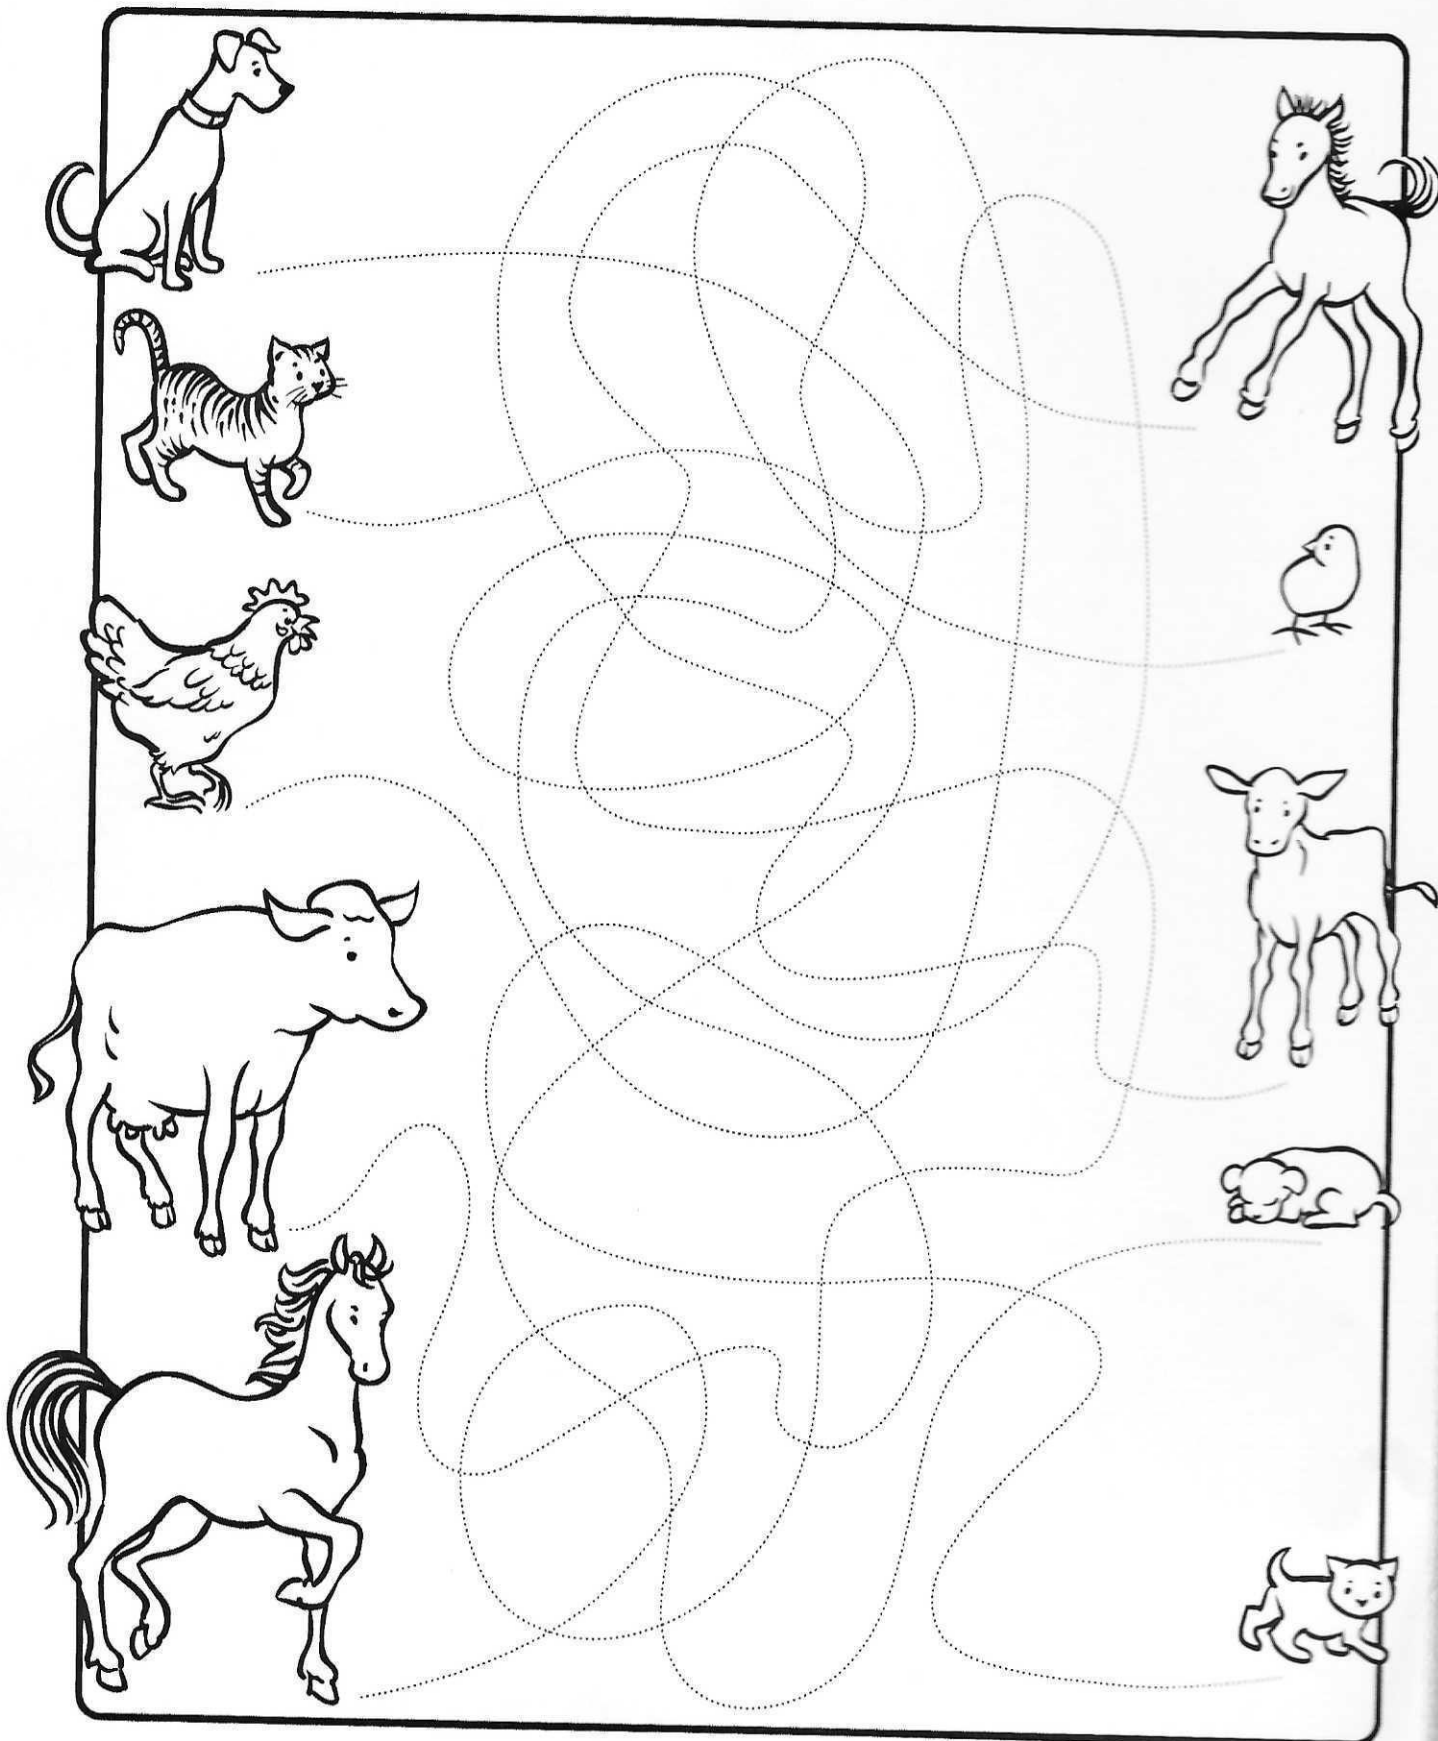

V obchodě se zvířátky prodávají pejsky, koťátka, želvy i myšky. Porovnej mezi sebou pelišky s malými pejsky a zakroužkuj ten, kde je pejsků víc. A stejně to udělej s ostatními zvířecími domečky. Nakonec celý obrázek pěkně vybarvi. (Děti nepočítají jednotlivá zvířátka, ale mají za úkol odhadnout, kde je jich více a kde méně.)

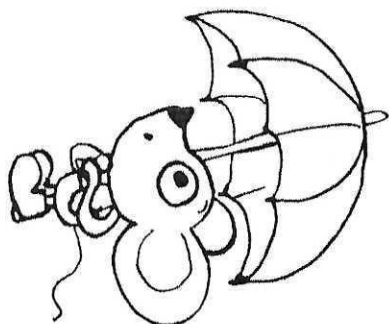

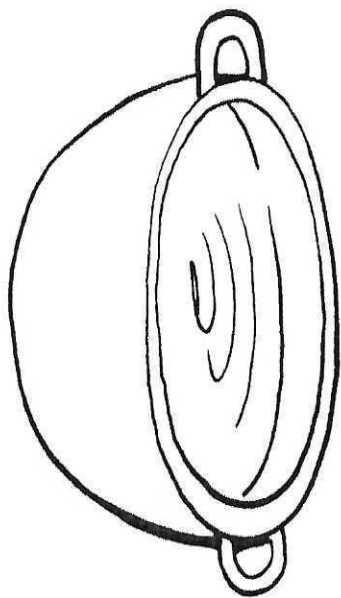

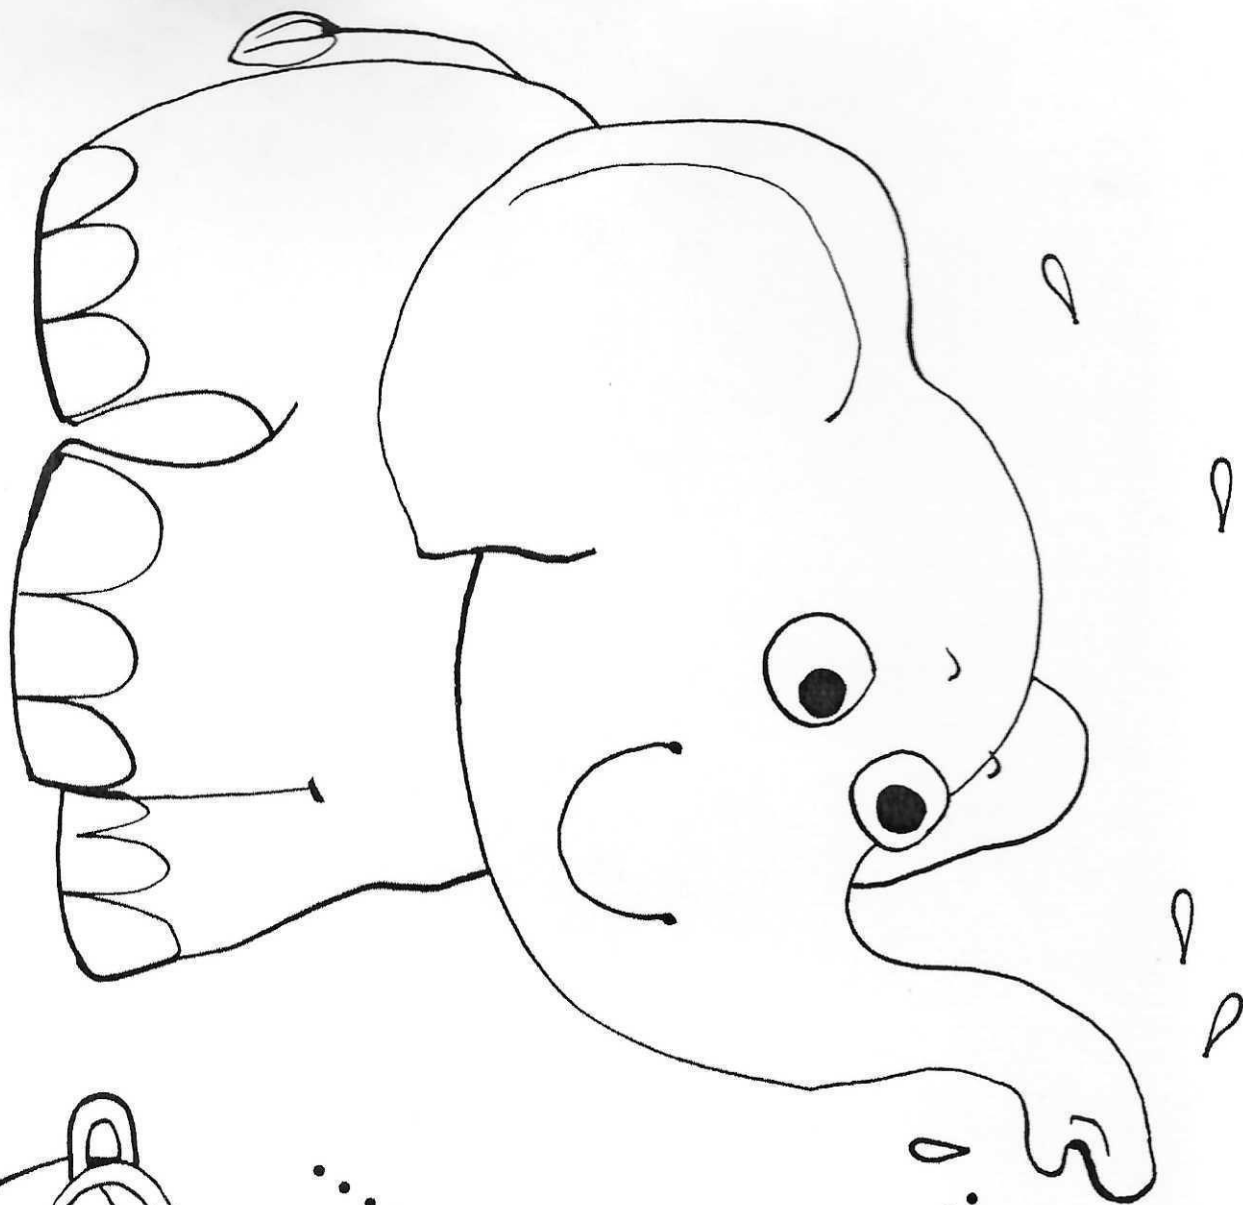

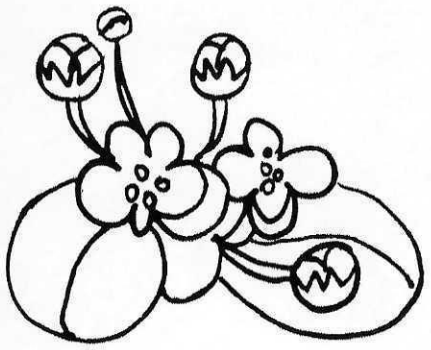

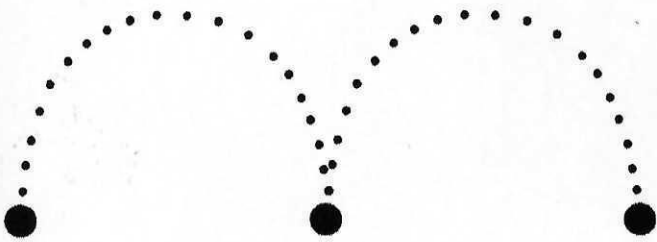

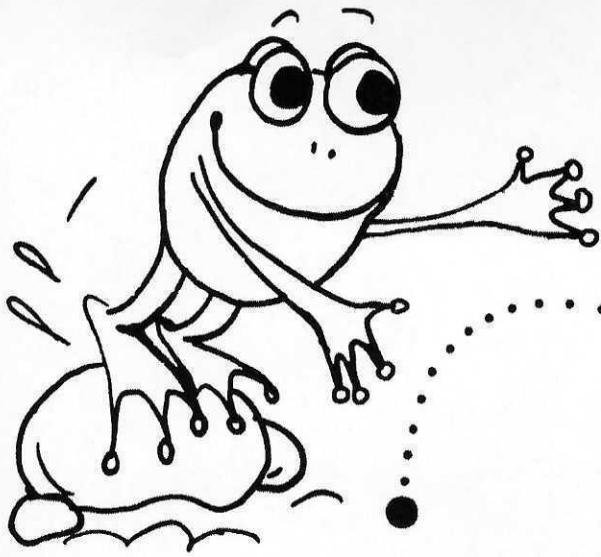

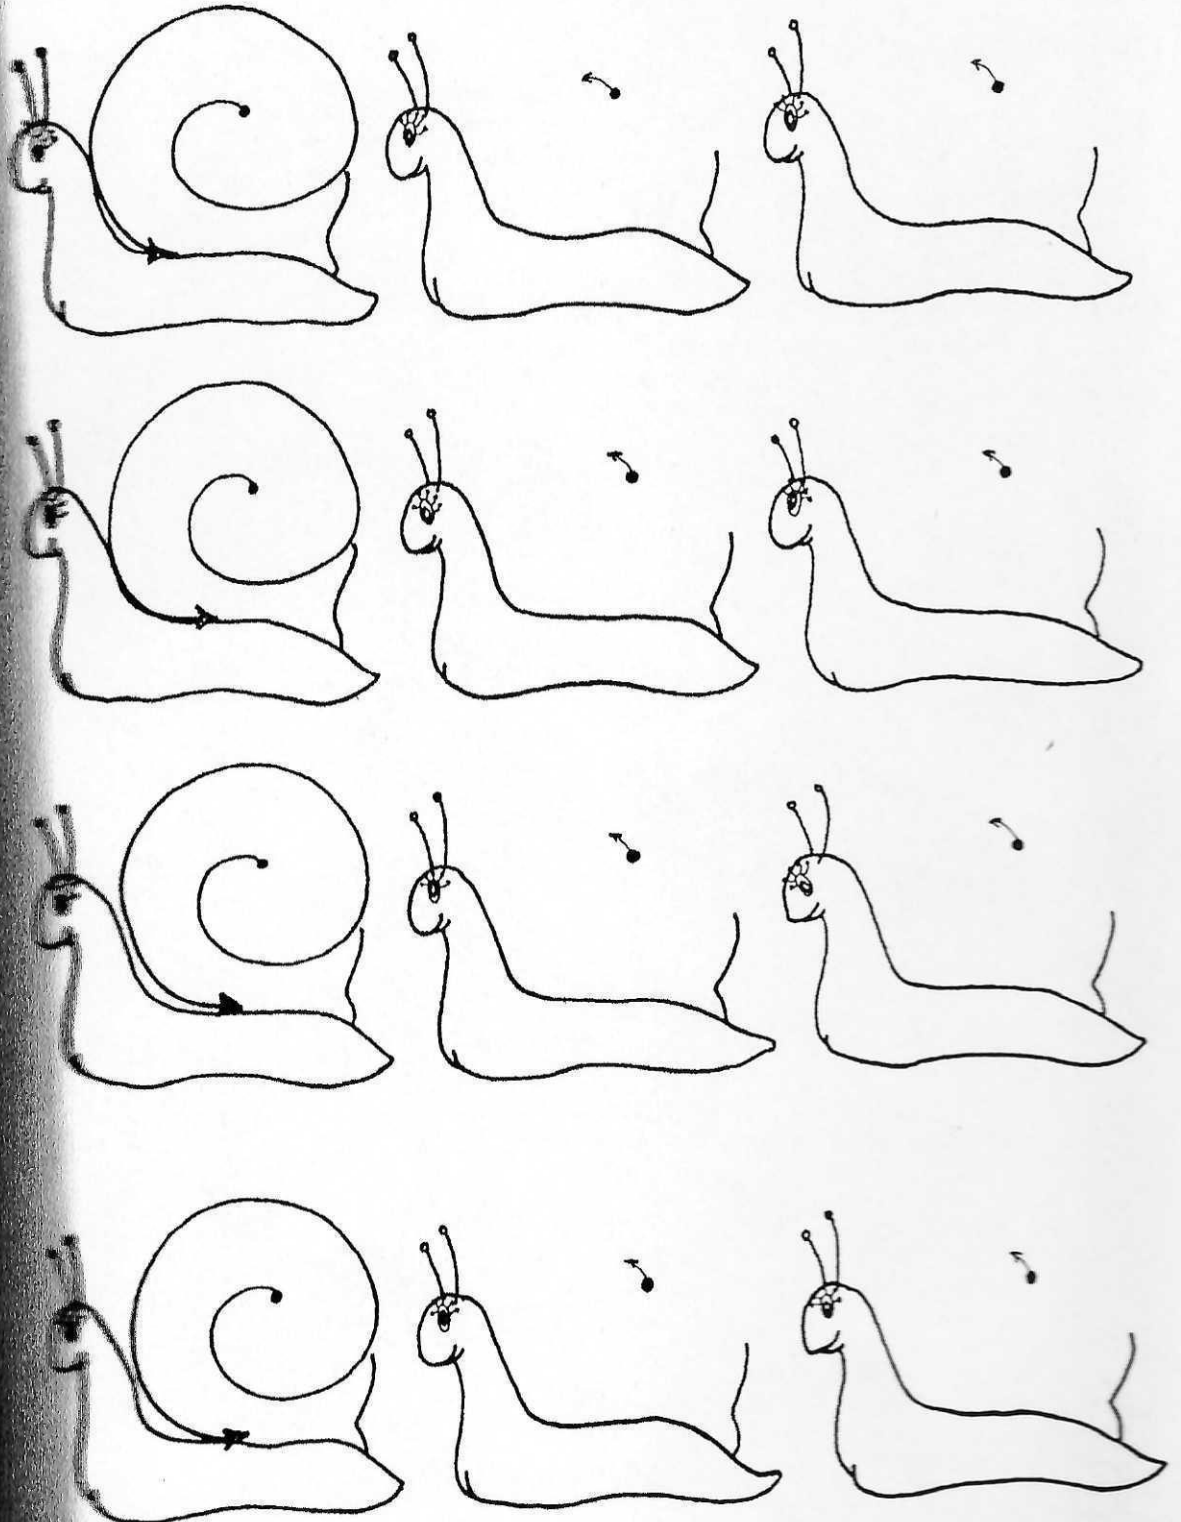

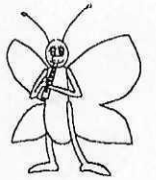

Tak jako každé děťátko má svoji maminku, i zvířátka mají svoje maminky. Najděte každému mládětku jeho maminku. Nejdříve si cestu ukažte prstíkem a potom ji vyznačte tužkou. Nakonec řekněte, jak se jmenují zvířátka a jejich mládětká.

# DOKRESLI ULITU

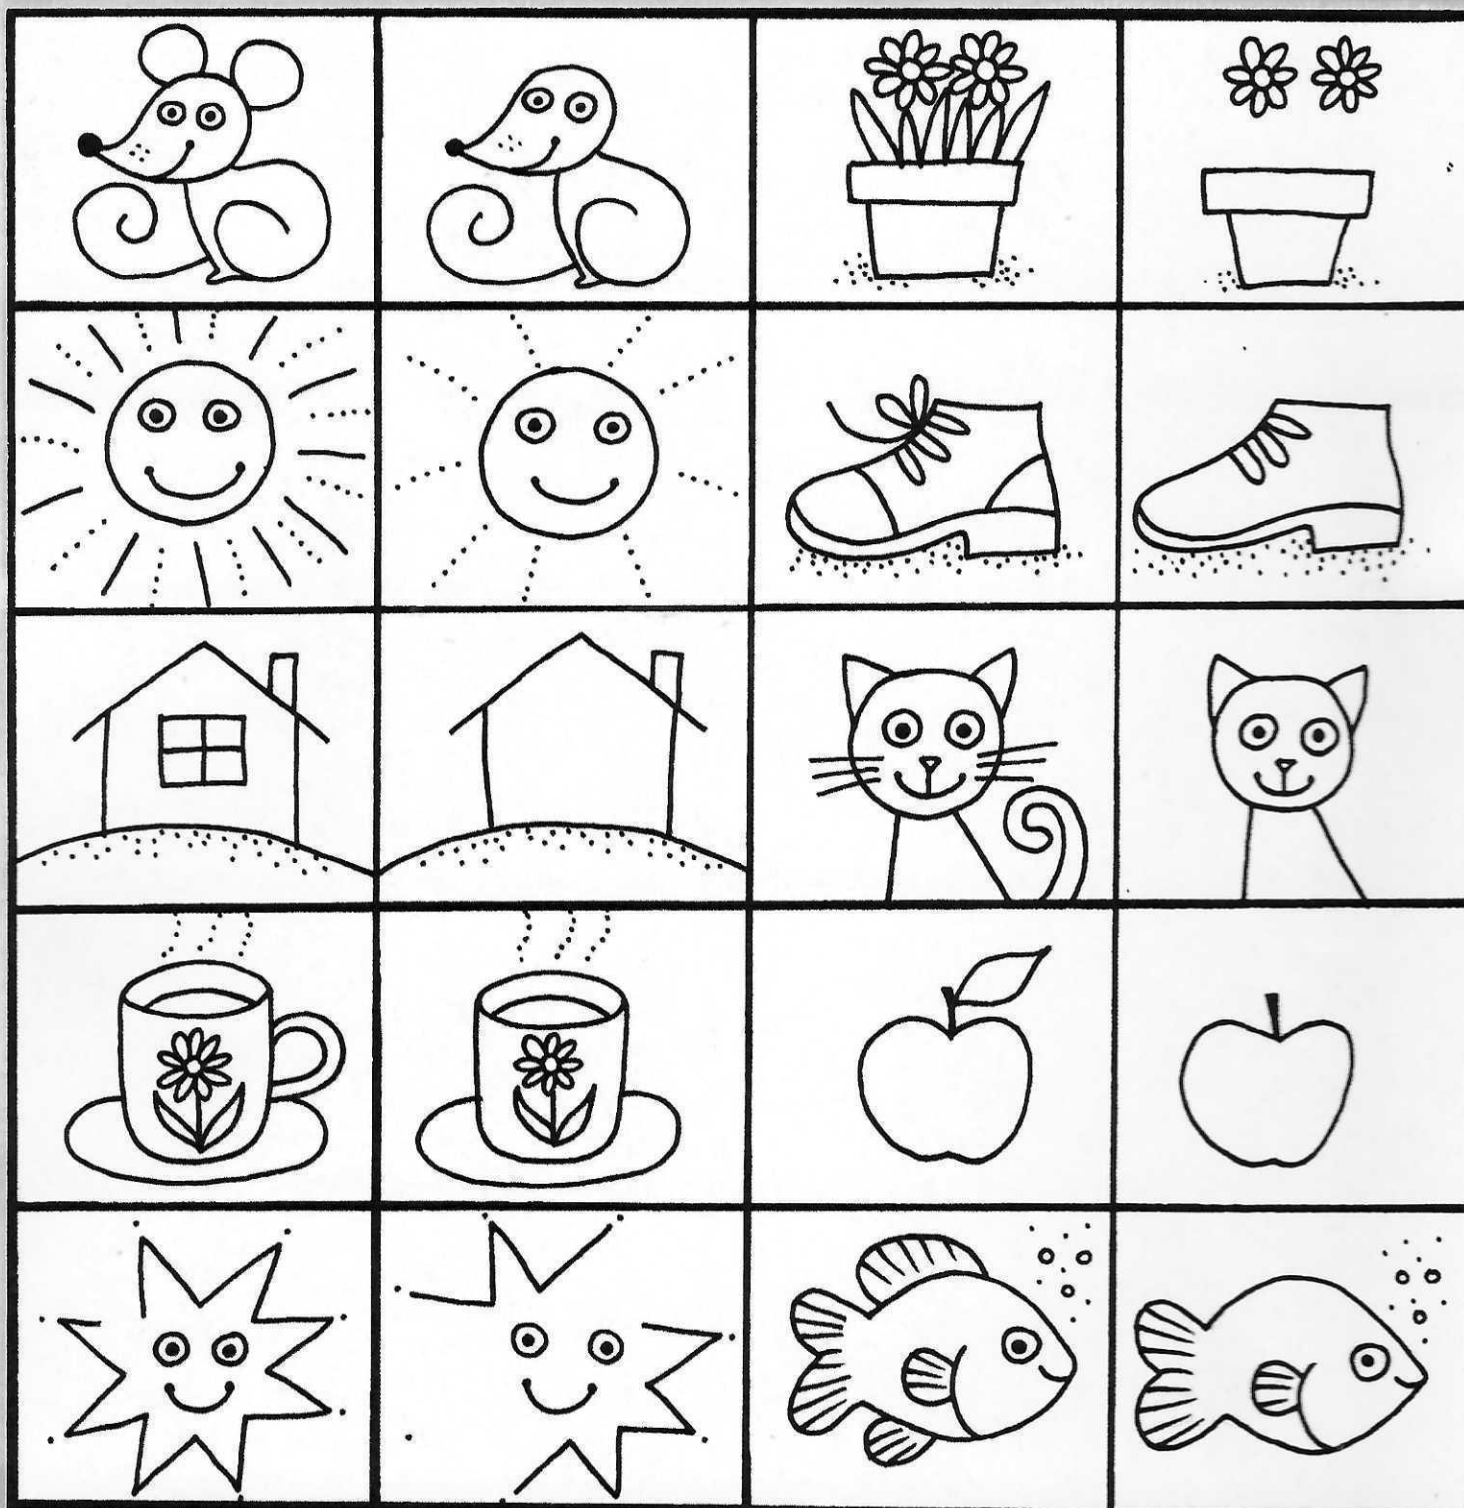

# PSANÍ BEZ PÍSMENEK

## Nedokončené pexeso

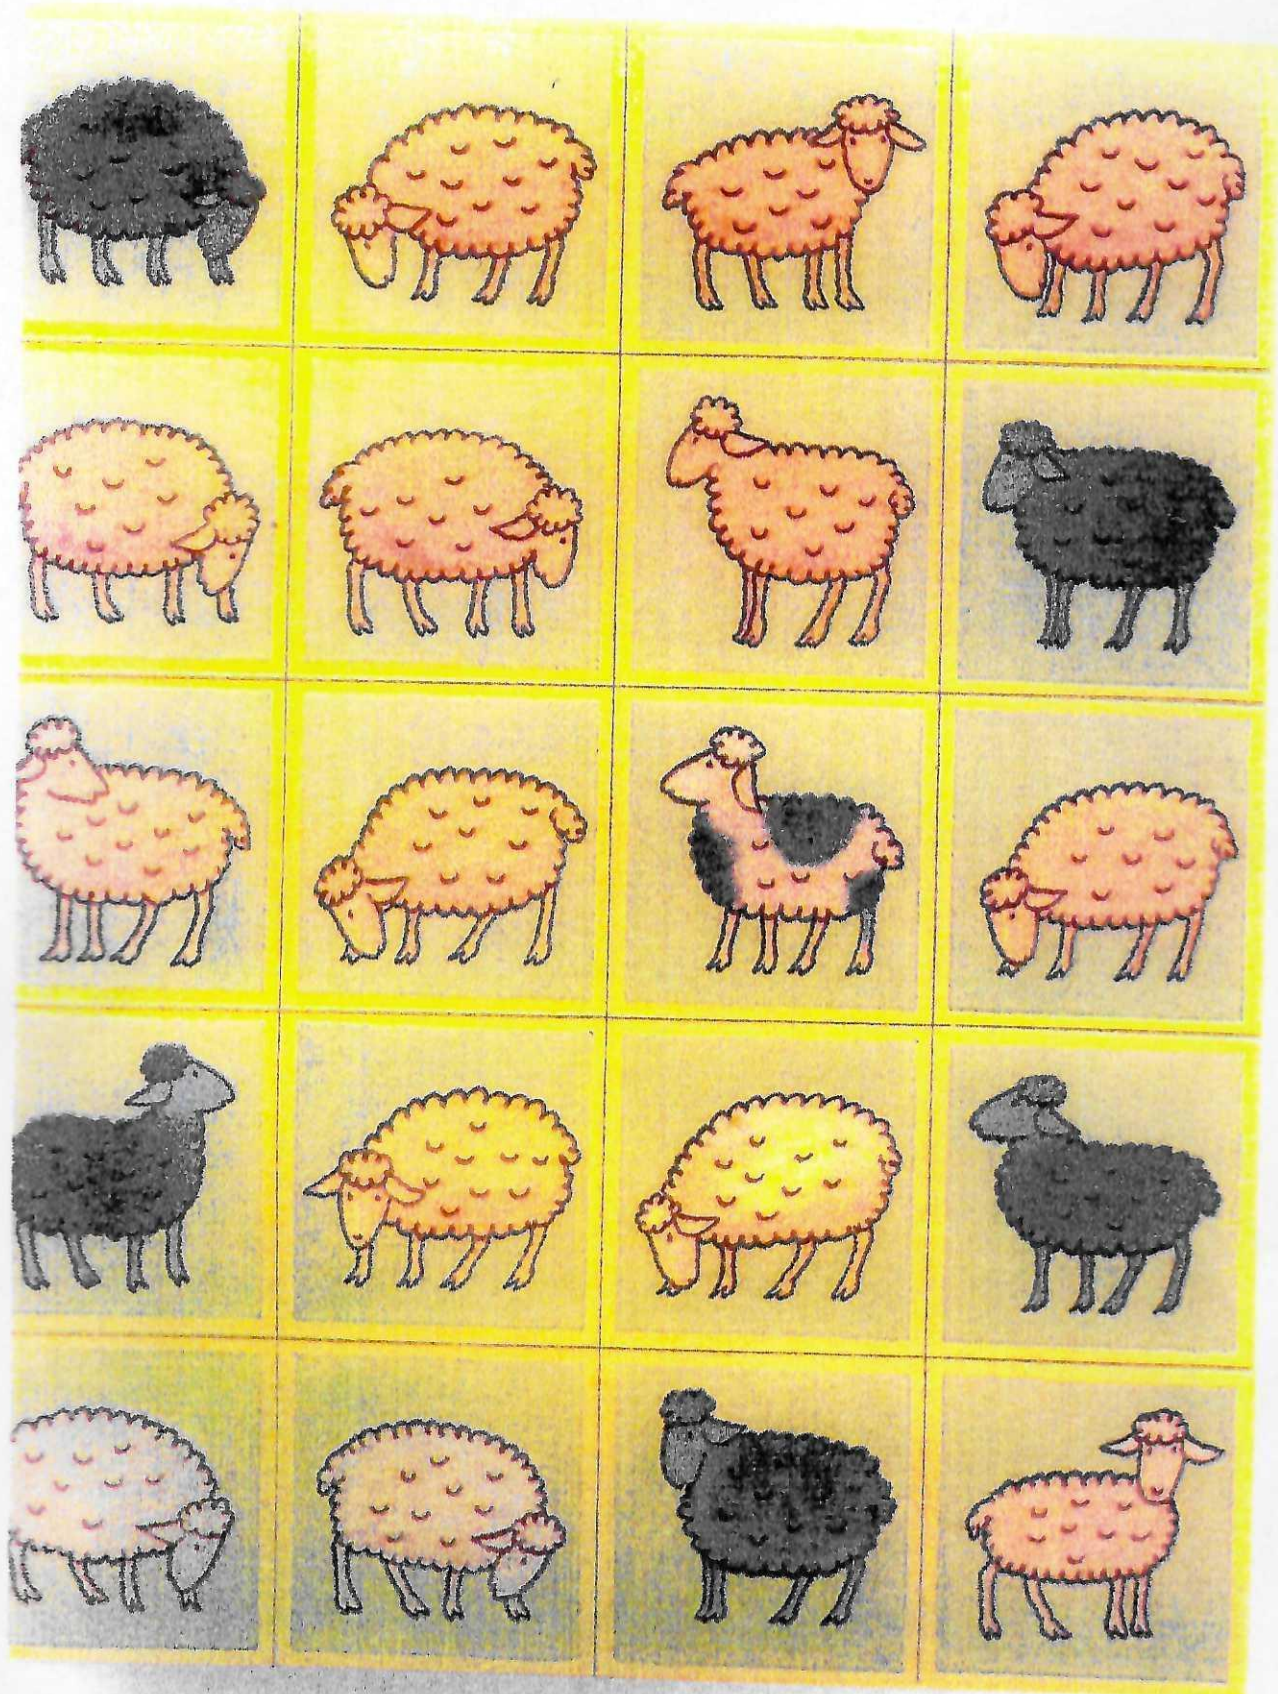

Đeti dostaly do školky nové pexeso. Obrázkům ale něco chybí. Dokresli obrázkové dvojice tak, aby na obou kartičkách byl stejný obrázek.

*(Dokreslování tvarů je důležité pro budoucí psaní.)*

hry je vést děti k pochopení průniku dvou množin, aniž  
 říká hovoří. Děti vytvářejí stádo všech oveček, oveček  
 oveček černých (tedy množinu a podmnožinu), uvažují,  
 patříla ovce černobílá. Tvořením dvojic porovnávají,  
 oveček je víc, kterých méně. (G)

Oveček je tu celé stádo, a pastýř nikde. Na pastýře si  
 zahrajete vy. Rozstříháte stránku na kartičky a rozdělíte  
 ovečky do ohrádek podle barev. Ohrádky si můžete  
 nakreslit, nebo udělat z provázku, z nitky, z papíru.

## Muchomůrka

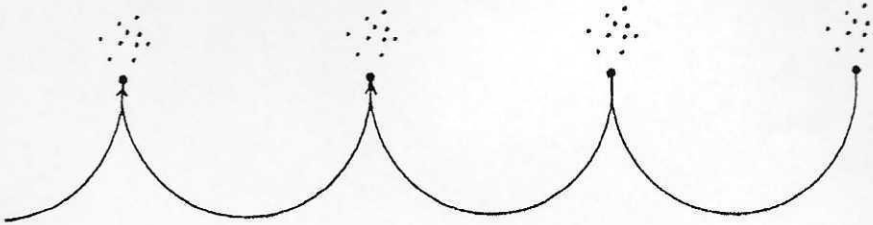

Muchomůrka ve své kráse  
u tří smrků červená se.

Dávej pozor, hošíku,  
ať ji nemáš v košíku !

# VRABEC POSKAKUJE

# KOUZELNÝ OBRÁZEK

Co to má být? Vezmi si pastelky a zkus tu motanici vyluštit! Všechny plochy označené kolečkem vybarvi oranžově, všechny označené křížkem modře, čtverečky červeně a trojúhelníčky zeleně. Budeš překvapený, co všechno se na obrázku objeví. Dobrou zábavu!

7

připravujeme ruku  
na psaní

Zkus napsat číslice. Nejdříve podle vzoru, nakonec samostatně.

To, co na zahrádku nepatří, dej do kroužku. Co na zahrádce naopak najít můžeš, vybarvi podle skutečnosti.

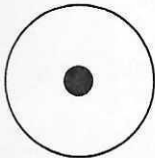

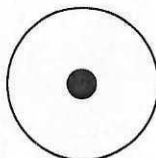

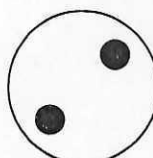

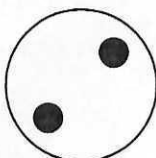

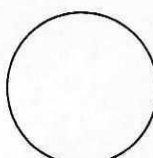

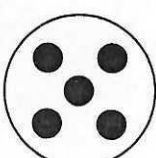

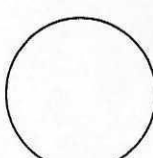

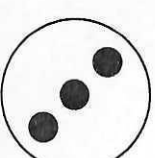

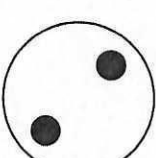

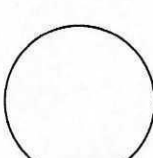

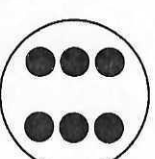

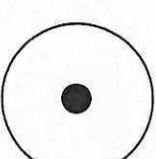

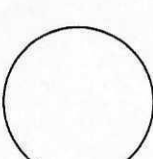

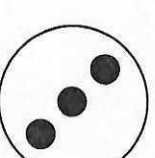

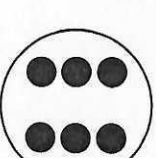

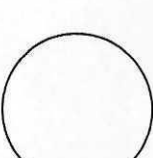

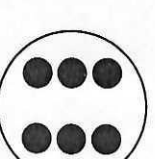

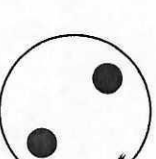

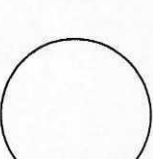

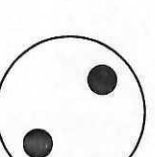

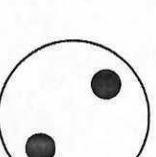

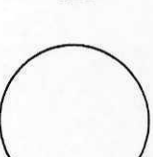

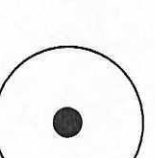

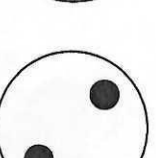

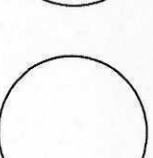

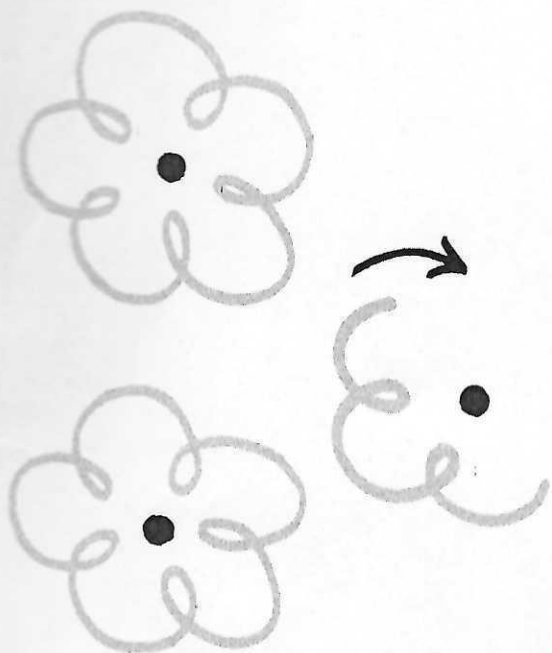

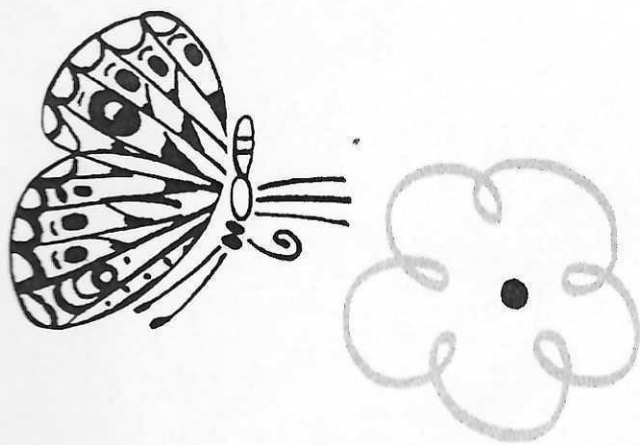

To, co na zahrádku nepatří, dej do kroužku. Co na zahrádce naopak najít můžeš, vybarvi podle skutečnosti.

Nakresli odpovídající počet teček do posledního kruhu. Jako vzor ti slouží situace na prvním řádku.

|                                                                                     |   |                                                                                     |   |                                                                                       |

|  | + |  | = |  |
|  | + |  | = |  |

Kolem středů lístků pět,  
namaluj si luční květ.

# 50. Kam letí a leze?

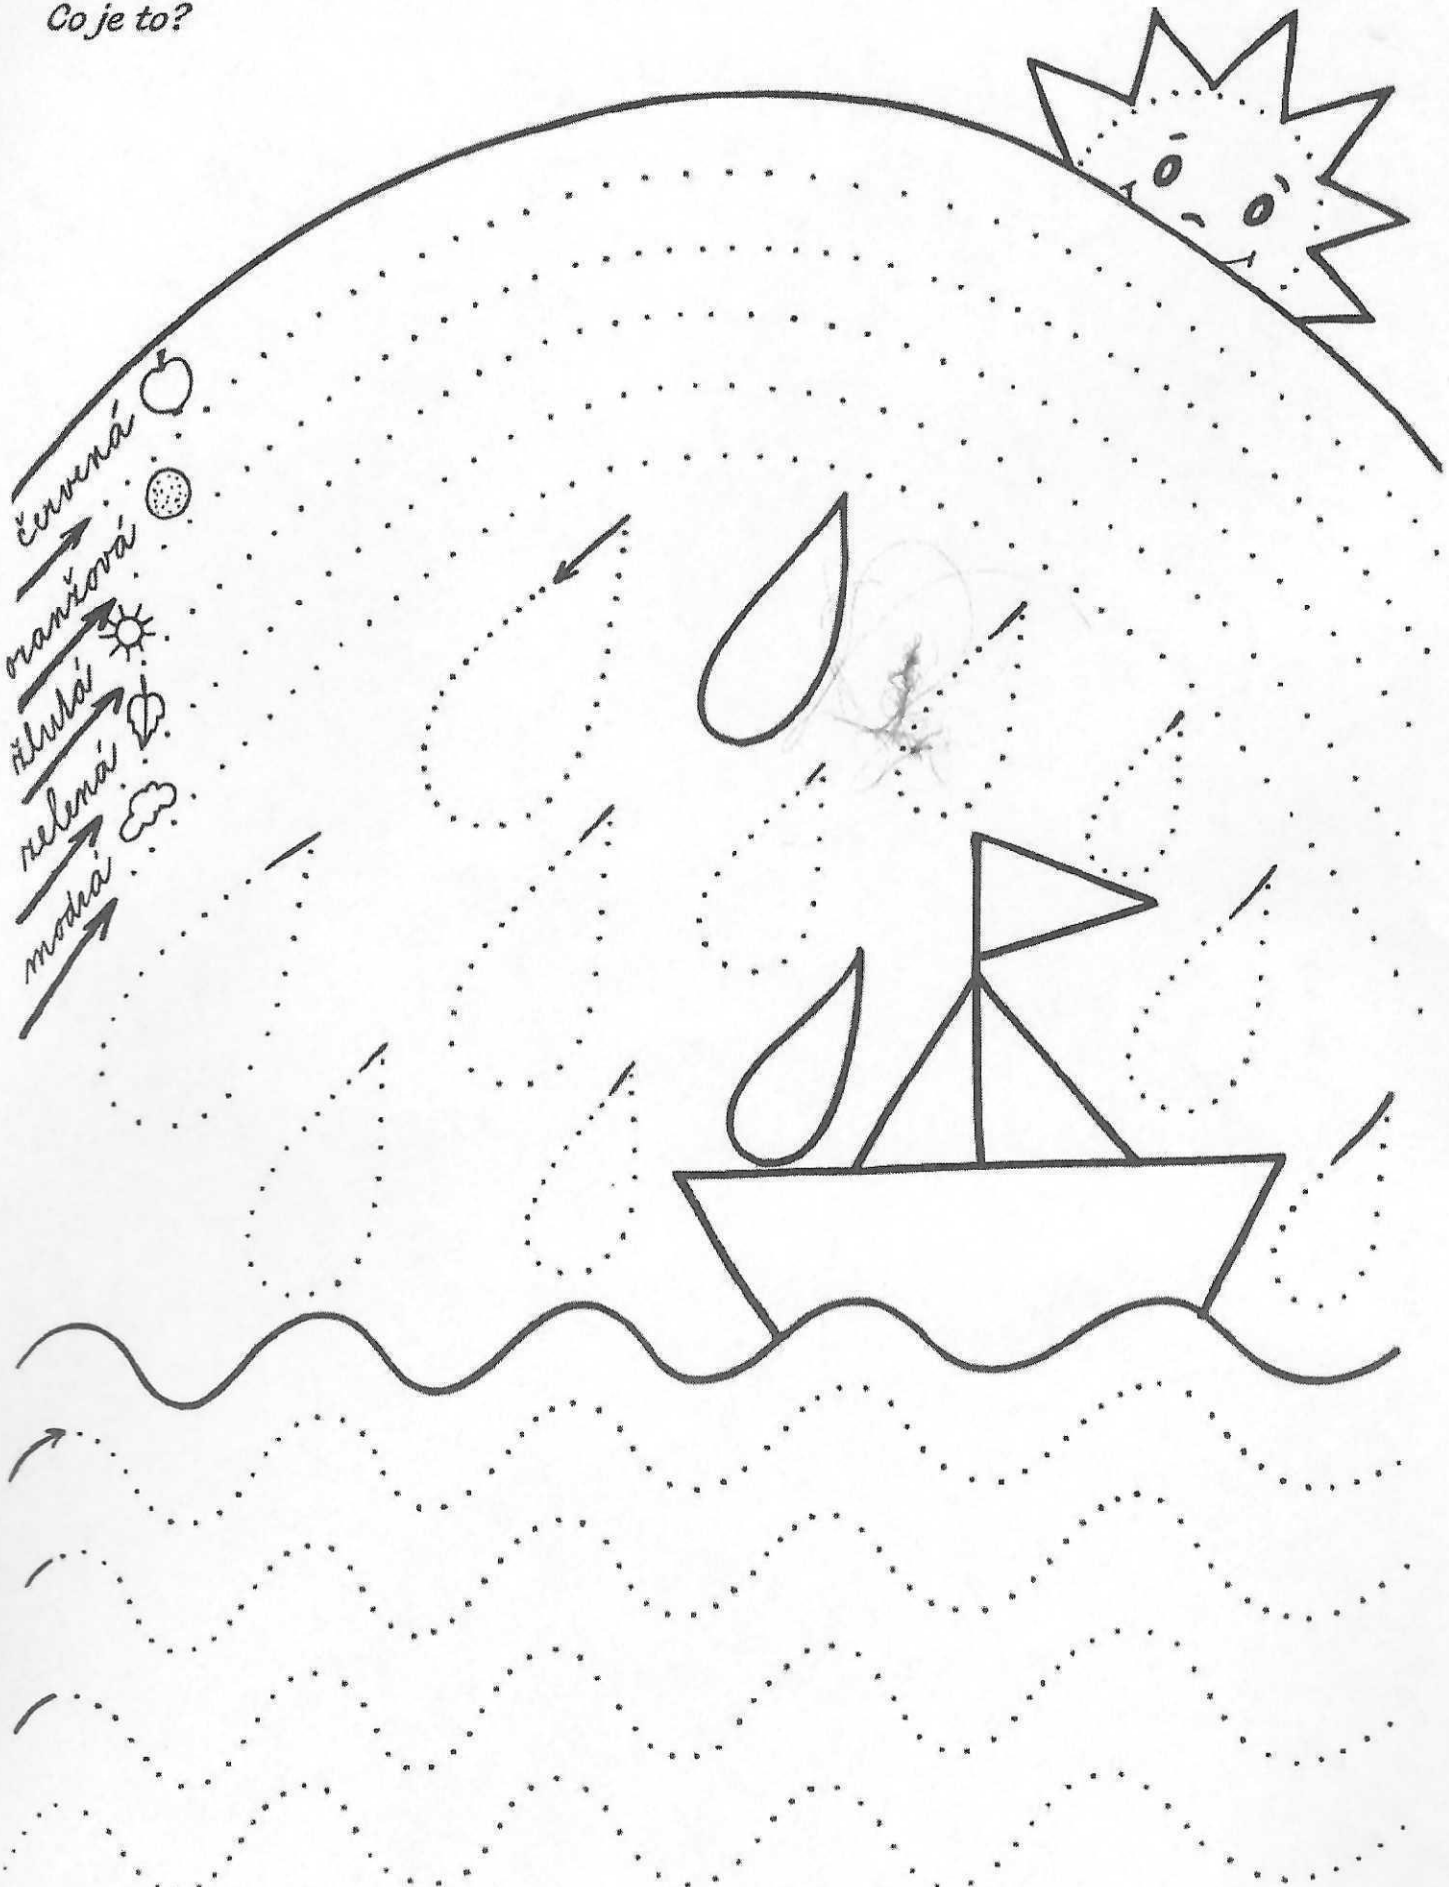

|    |     |     |     |                                                                                     |
|----|-----|-----|-----|-------------------------------------------------------------------------------------|
| 5+ | BIO | PSY | ENV |  |
|----|-----|-----|-----|-------------------------------------------------------------------------------------|

Zakroužkuj hmyz, který leze nebo letí v jedné řadě opačným směrem.

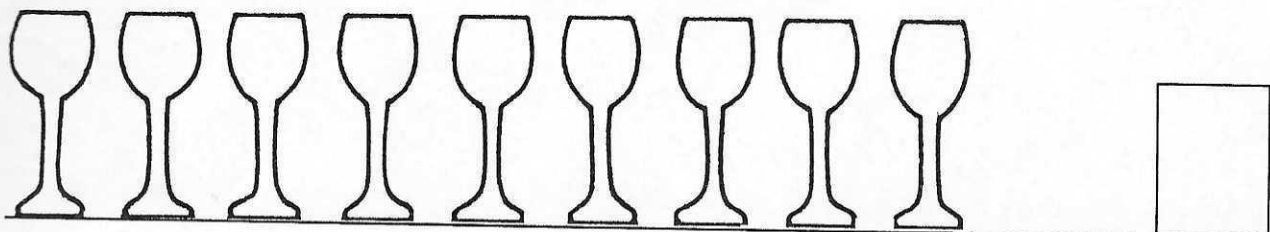

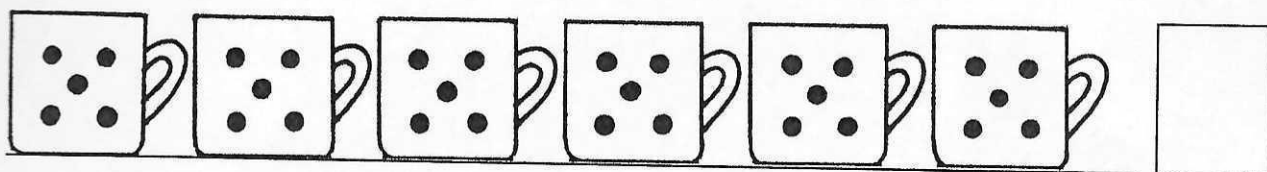

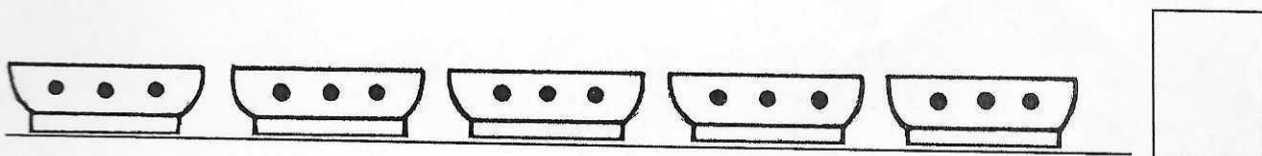

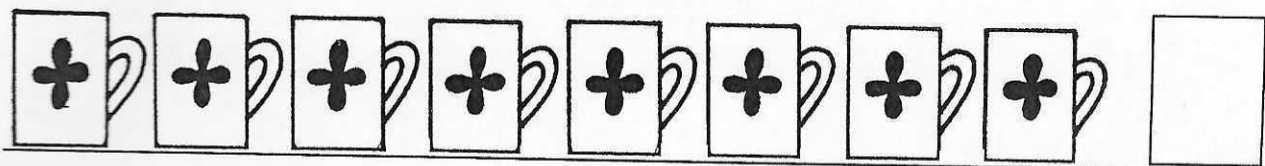

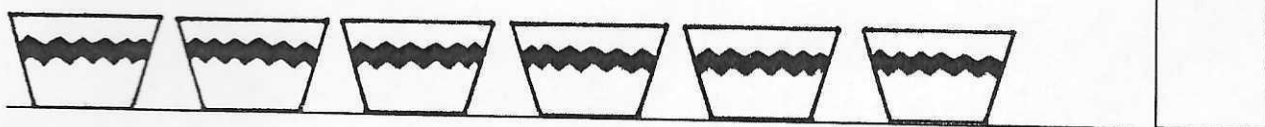

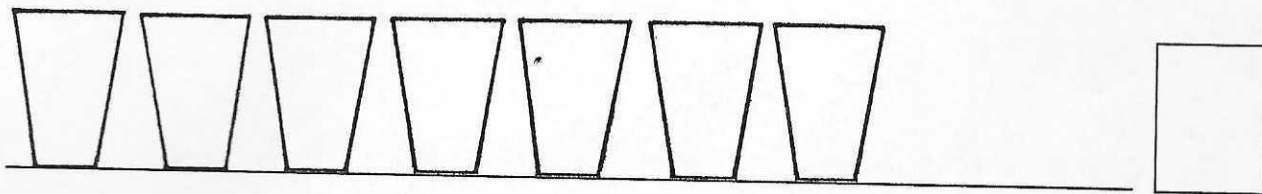

Slunce s deštěm stavi most,  
prý už bylo bouřky dost.  
Co je to?

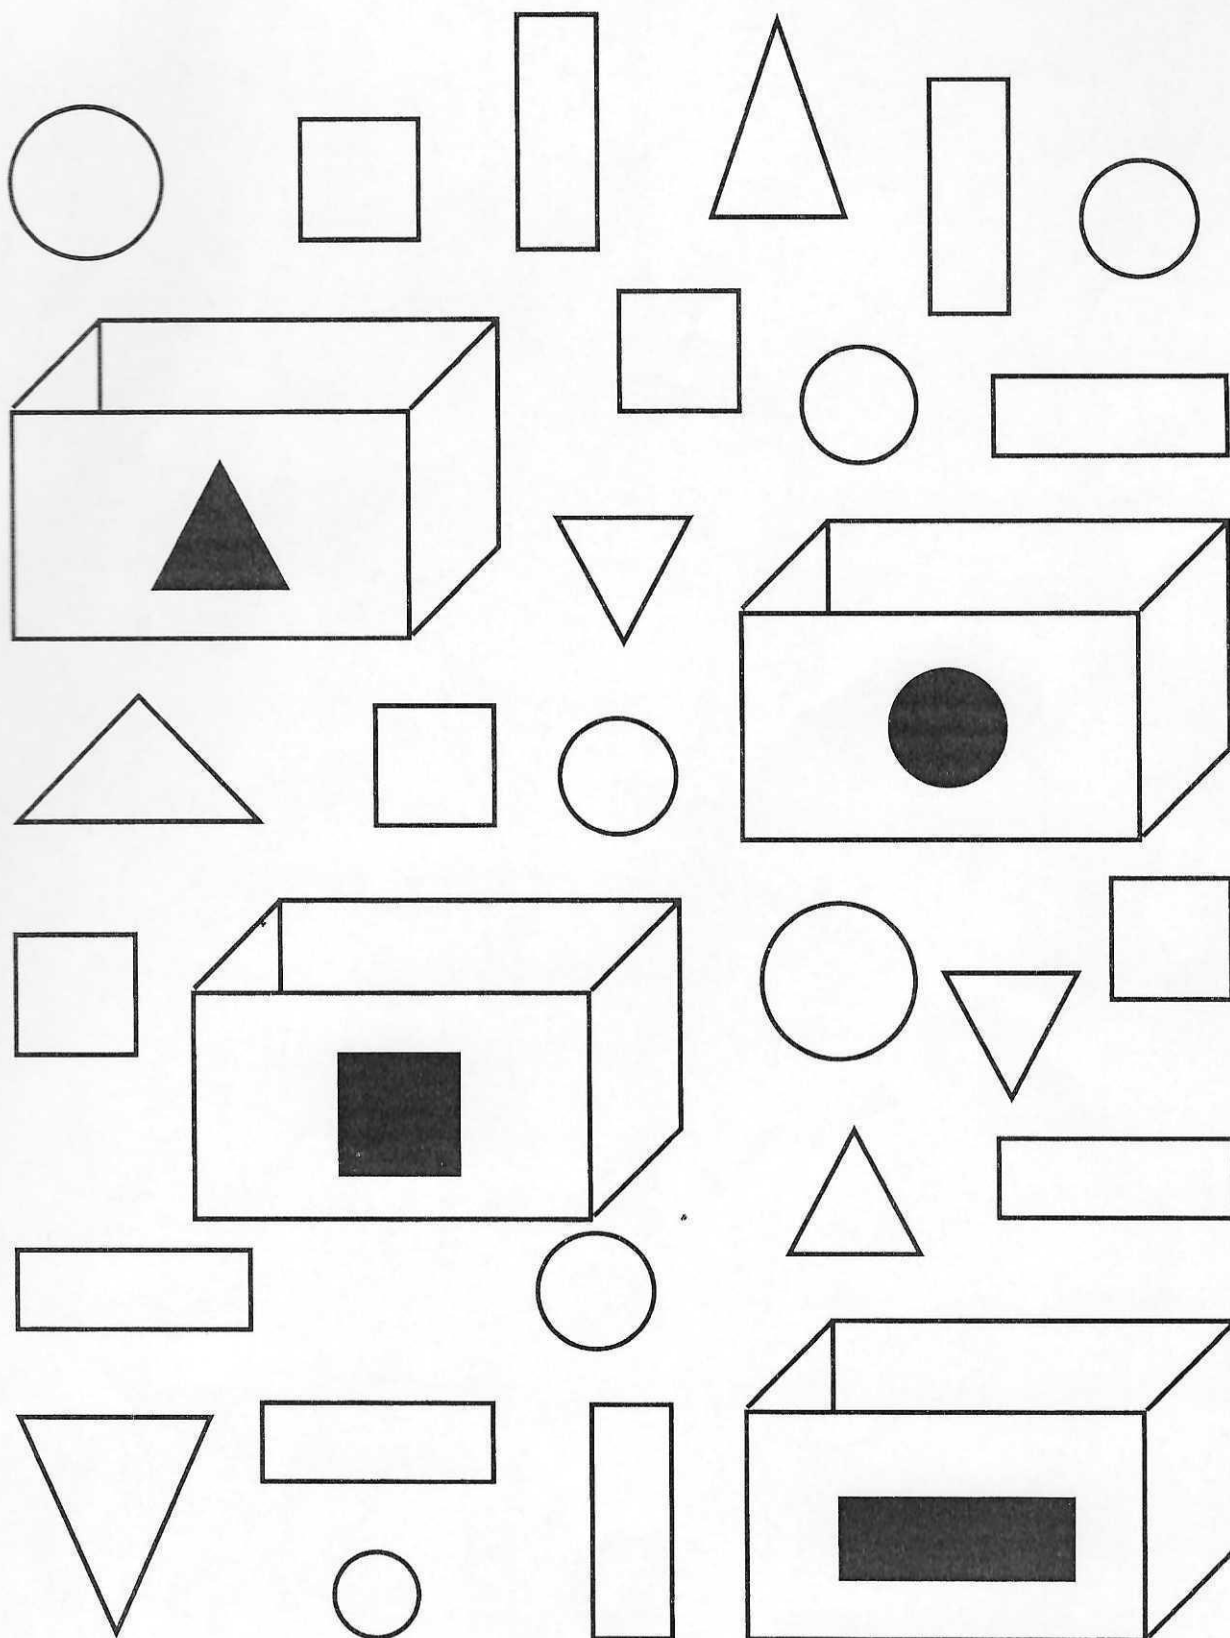

Jestli jsi uhádnul hádanku, obrázek dokonči a vybarvi.

Andulka mamince pomáhala s nádobím. Měla však smolný den a od všeho něco rozbila. Spočítej, kolik hrnků, sklenic, talířů a misek zničila. Zapiš číslicemi do rámečků vpravo.

Na obrázku jsou bedny, do kterých se ukládají dílky stavebnice. Kolem jsou rozsypané dílky: **trojúhelníky**, **čtverce**, **obdélníky** a **kruhy**. Vezmi pastelky a každý tvar spoj se správnou bednou.

Jsou obě kočky stejné? Nejsou? Pokus se je tedy domalovat tak, aby stejné byly. Kočičku na dolním obrázku dokonči podle té horní.
